School of Business Admin - Accounting - Subject: Accounting

ACCT 201(3)	Course ID:001049	15-MAR-2006	
Introductory Accounting 1			
Prerequisite: Sophomore s	tanding. The major emphasis	is on the development and rep	porting of accounting
information for use by ir	vestors, creditors, and others.	The student is required to de	evelop skills in the
preparation and use of ac	counting information and must d	emonstrate an understanding of	f the accounting
process, and be able to e	valuate the impact of estimates	, alternative accounting princ	ciples, and the
limitations of the accour	ting model on accounting inform	ation. Topics include: prepara	ation and use of
financial statements; the	e accounting process; and the me	asurement and reporting of ind	come, assets,
liabilities, and owners;	equity. Outcome: The studen	t will be able to understand t	the underlying
principles, design, conce	pts, limitations, and the neces	sity of accounting systems.	The student will gain an
appreciation of the uses	of financial data and financial	statements and their impact of	on business decisions.

Introductory Accounting II

Prerequisites: Sophomore standing, & a minimum grade of ""C-"" in ACCT 201. This course highlights the differences between financial accounting and managerial accounting. The course begins by completing the study of transactions and events affecting financial statements. The cash flow statement is then explored in some detail. Finally, financial statement analysis as traditionally practiced, is considered a capstone for financial accounting. The course then focuses on the use of accounting data by management. Product costing in a manufacturing setting, assigning of costs to objects, learning how costs behave, and the use of accounting data by management in planning operations, controlling operations, and in short term decision making are all investigated. Outcome: The student will be able to understand the differences between cash and accrual accounting, the use of ratio analysis in investing and managing decisions, the value and importance of identifying and allocating costs, and the methods involved in the budgeting process.

ACCT 231(3)

ACCT 202(3)

Managerial Accounting

Prerequisites: Sophomore standing and a minimum grade of ""C-"" in ACCT 201 and 202. This course critically evaluates product cost for inventory valuation and income determination. In addition, budgeting and control procedures are emphasized. Topics discussed include job order costing, process costing, activity-based costing, full absorption and direct costing, an introduction to overhead allocation, cost estimation, cost-volume-profit analysis, budgeting, standard costs, analysis of variances, and capital budgeting. The course incorporates computer applications to managerial accounting analysis. Outcome: Students develop an application and analysis level of learning for matching cost flows to product flows and will be able to demonstrate an understanding of budgeting, variance analysis, product costing, relevant decision making and capital budgeting.

ACCT 303(3) Course ID:001052 15-MAR-2006 Intermediate Accounting I Prerequisites: Junior standing, minimum grade of ""C-"" in both ACCT 201 and 202. The first in a series of courses designed to provide in-depth coverage of the generally accepted principles underlying financial statements and financial reporting, from conceptual framework to application. Topics include alternatives for measurement of revenue and asset valuation, and presentation of financial statements. Lectures, discussions, and technical readings are supplemented with extensive problem and written assignments. Outcomes: Students will demonstrate their understanding of the accounting process leading to financial reports. Furthermore students will also develop the ability to apply critical thinking and analytical skills toward the solution of problems concerning valuation of assets, and revenue and expense recognition. Components: Lecture Requirement Group: Prerequisites: Junior standing: minimum grade of "C-" in ACCT 201 and 202.

Requirement Group: Prerequisites: Junior standing; minimum grade of "C-" in ACCT 201 and 202. **Room Requirements:** General Classroom(1)

ACCT 304(3) Course ID:001053 15-MAR-2006

Intermediate Accounting II Prerequisites: Junior standing, a minimum grade of ""C-"" in ACCT 303. This course is an extension of Intermediate I where students use the conceptual framework to consistently evaluate and explain accounting practice. This allows the student to not only understand the accounting methodologies but also recognize why these approaches are generally superior to alternative accounting treatments. Topics include concepts of present and future value, investments in financial instruments (debt and equity), leases, pensions, income taxes, earnings per share, and the statement of cash flow. Outcome: Students will be able to demonstrate an understanding of the professional pronouncements as they relate to the measurement, recognition, and reporting of financial information. Students will also be able to demonstrate an understanding of how to research relevant accounting issues to better prepare for professional certification.

Components: Lecture Requirement Group: Prerequisites: Junior standing, a minimum grade of "C-" in ACCT 303. Room Requirements: General Classroom(1)

ACCT 306(3)

Course ID:001055 Advanced Accounting: Business Combinations, Consolidations & International

Prerequisites: Junior standing, minimum grade of ""C-"" in ACCT 303. Topics include accounting for business combinations, long-term equity accounting, consolidated financial statements, branch accounting, and international accounting. Course includes extensive problem assignments. Outcome: Students will understand the accounting for corporate acquisitions, equity method investments and corporate consolidations including intercorporate transactions.

Accounting Information Systems Prerequisites: Junior standing; minimum grade of ""C-"" in ACCT 303 and ISOM 247. Included among the topics covered in this course are the primary accounting cycles, accounting information system internal controls, and selective fraud issues. Students will also build flowcharting skills and gain experience working on an enterprise resource planning system (ERP) with real-world company data. Outcome: Students develop an application and analysis level of learning regarding the function of an accounting information system in business with specific emphasis on risk management, along with the ability to work with and deploy ERP tools.

Components: Lecture Requirement Group: Prerequisites: Junior standing; minimum grade of "C-" in ACCT 303 and ISOM 247. Room Requirements: General Classroom(1)

ACCT 311(3)

ACCT 308(3)

Course ID:001058 Auditing & Internal Control Systems

Prerequisites: Junior standing, minimum grade of ""C-"" in ACCT 303. Course involves an in-depth investigation of internal control structure and systems and the theory of audit evidence. Theoretical principles and practical issues involved in planning and executing an audit are explored. Internal control policies and procedures and principal evidence techniques for major transaction cycles or account groups are studied in depth. Study of appropriate AICPA professional standards is an integral part of this course. Outcomes: Students who successfully complete this course will be able to: understand the role of

professional standards in the audit of financial statements; demonstrate their ability to research those standards; and demonstrate their understanding of the audit process in particular the roles of evidence and internal control.

School of Business Admin - Humn Resources & Employmnt Rel - Subject: Humn Resources & Employmnt Rel

HRER 311(3) Course ID:010577 06-DEC-2007

Employment Relations

ons

This course provides an introductory overview of labor-management relations, collective bargaining, and labor law in the United States and the structure and function of our employment relations system. Outcome: Students will demonstrate how unions, management representatives and government dynamically interact to provide employee representation, balance group interests and ideally avoid disruptive workplace conflict. Prerequisites: Junior Standing, minimum grade of ""C-"" in MGMT 201.

Components: Lecture(In person)

Room Requirements: Electronic Classroom(1)

HRER 313(3) Course ID:010578 13-APR-2008

Compensation Management

This course examines reward policies, programs and practices over such matters as base-pay, employee benefits and incentive in private and public organizations. Outcome: Students will learn how to design and implement reward programs that will give their employers a competitive advantage; to resolve compensation problems from both a human resource professional and managerial perspective; and to negotiate fair pay packages with their employers. Students will improve their team leadership, analytical and writing skills. Prerequisites: Junior Standing, minimum grade of ""C-"" in MGMT 201

Components:

Requirement Group: Prerequisites: Junior Standing, minimum grade of "C-" in MGMT 201 and ISOM 241. **Room Requirements:** Electronic Classroom(1)

HRER 317(3) Course ID:010579 06-DEC-2007

Lecture(In person)

Human Resource Staffing

This course covers topics related to organizational staffing, including job analysis, forecasting, use of biographical information, interviewing, statistical analysis, performance evaluation and legal issues related to selection. Outcome: Students will acquire the knowledge and skills necessary for the development, implementation and evaluation of a staffing system. Prerequisites: Junior Standing, minimum grade of ""C-"" in MGMT 201.

Components: Lecture(In person) Room Requirements: Electronic Classroom(1)

HRER 322(3) Course ID:010580 06-DEC-2007

Human Resource Development

This course examines how organizations develop employees with the technical, interpersonal and leadership skills to be effective in their jobs. The course will incorporate training, development, and performance management topics. Outcome: Students will learn how to conduct a training needs assessment, set learning objectives, establish evaluation criteria, select the best instructional methods, conduct a training program and evaluate the impact of the program on the learner and organization. Students will also improve their presentation, team leadership, analytical and writing skills. Prerequisites: Junior Standing, minimum grade of ""C-"" in MGMT 201

Components: Lecture(In person) Room Requirements: Electronic Classroom(1)

HRER 325(3) Course ID:010581 06-DEC-2007

Global Employment Relations

This course has two basic objectives: to familiarize students with different employment relations systems in advanced industrial economies in North America, Europe, and Asia to introduce students to labor problems associated with a global economy (e.g., sweatshops, child labor, slavery and other coercive labor systems) and to proposed approaches to redressing these problems (e.g., transnational institutions like the ILO, trade agreements, voluntary codes of conduct, labor unions). Prerequisites: Junior Standing, minimum grade of ""C-"" in MGMT 201

Components:Lecture(In person)Room Requirements:Electronic Classroom(1)

HRER 329(3) Course ID:010587 07-DEC-2007

Global HR and Org Behavior

This course provides an understanding of the critical roles of Human Resource professionals throughout the strategic globalization process. The course will also teach one to become aware of cross-cultural issues that affect organizational dynamics and behaviors central to management processes, such as staffing, motivation, negotiation, communication, and leadership. Prerequisites: Junior Standing, minimum grade of ""C-"" in MGMT 201

Components: Lecture (In person) Room Requirements: Electronic Classroom(1)

ISOM 489(3) Course ID:004188 15-MAR-2006	
Indep Study-Produc & Oper Mgmt	
Independent study is in-depth research or reading, initiated by the student and jointly developed with a faculty member, into a specialized area of operations management not otherwise covered by department cours offerings.	se
Components: Independent Study	
Requirement Group: Pre-requisite: Graduate School of Business student.	
ISOM 490(3) Course ID:004189 15-MAR-2006	
Found of Business Modeling	la
Introduces and prepares the non-math-oriented student for the use of mathematical modeling in business. The areas are presented: probability concepts and the modeling of uncertainty, algebraic formulation and solution of business problems using linear programming, and the use of calculus for optimizing functions. Outcomes Students learn the tools for modeling business decision problems and the techniques for finding solutions these models.	tion me:
Components: Lecture	
Requirement Group: Pre-requisite: Graduate School of Business student. Room Requirements: Electronic Classroom(1)	
ISOM 491(3) Course ID:004190 15-MAR-2006	
Managerial Statistics	
The fundamentals of managerial statistics are presented. Topics may include descriptive statistics, random variables, probability distributions, estimation, hypothesis testing, regression, and correlation analysis Statistical software is used to assist in the analysis of these problems. Outcome: Students will be able	s. e to
demonstrate understanding of statistical thinking and data analysis technique for decision-making purposes Components: Lecture	5.
Requirement Group: Pre-requisite: Graduate School of Business student. Room Requirements: Electronic Classroom(1)	
ISOM 492(3) Course ID:004191 15-MAR-2006	
Database Systems This course uses database systems as the focus for studying concepts of data modeling and data manipulation Procedures for creating, managing, sorting, and processing data are discussed. Concepts of relational database methods are covered as well as the issues that arise in managing information in a database and us it to support business processes. Outcome: Understanding the development and use of business database systems. Components: Lecture	sing
Requirement Group: Pre-requisite: Graduate School of Business student. Room Requirements: Electronic Classroom(1)	
ISOM 493(3) Course ID:004192 15-MAR-2006	
Strategic Uses of IT Focuses on how to think about strategic use of information and information technology for competitive advantage. It introduces different approaches dealing with (e-)business strategy in ever-changing, IT-intensive environments. (Online) case discussions are used to illustrate the application of various approaches. Outcome: Think strategically about information technology to gain a competitive advantage.	
Components: Lecture Requirement Group: Pre-requisite: Graduate School of Business student. Room Requirements: Electronic Classroom(1)	
ISOM 494(3) Course ID:004193 01-MAY-2006	
Data Mining Data Mining involves the search for patterns in large quantities of data. The fundamental techniques used data mining include, but are not limited to, clustering, decision trees, neural networks, and association analysis. Outcome: The student will be able to build models using an industry-standard package and interpret the results. Components: Lecture	
Course Equivalents: CSIS 494	
Requirement Group: Restricted to Graduate School or Graduate Business students. Room Requirements: Electronic Classroom(1)

East Asian Pop Culture The study and analysis of popular culture in Korea, Taiwan, China and Japan will provide insights into gender transformations, ethnic identity nationalism, emerging youth subcultures, and transnational cultural flows. Outcome: Students will learn to critically think about popular culture through an anthropological perspective, gain an understanding of relevant economic, cultural and social issues, and develop an appreciation for the nations and peoples of the region. Components: Lecture (In person) Course Equivalents: ASIA 223, INTS 223 Room Requirements: Electronic Classroom(1)

ANTH 303(3) Course ID:010267 04-MAR-2007

People and Conservation

ANTH 305(3)

This course considers the interplay between indigenous peoples and environmental resources utilizing current perspectives from evolutionary and community ecology, conservation biology, anthropology, political ecology snd economics. Outcomes: Students will demonstrate an understanding of factors influencing this interplay, including environmental ethics, traditional environmental knowledge, resource management, community-based conservation, property rights, common-pool resources, sustainable development, land tenure, indigenous movements, and eco-tourism.

Components: Lecture(In person) Room Requirements: General Classroom(1)

Violence and Culture This course examines the comples relationships between violence and culture using the ethnographic method as practiced by anthropologists and other social scientists. Outcome: Students will demonstrate an understanding of the ways violence destroys, alters or produces forms of cultural meaning and social action and the ways in which cultural difference impacts patterns of violence. Lecture(In person) Components: Course Equivalents: INTS 303

Course ID:010264

Room Requirements: General Classroom(1)

ANTH 306(3) Course ID:010268 04-MAR-2007 Anthropology and Human Rights Prerequisite: ANTH 102 or Department Permission. This course examines the concept of universal human rights, and the social movement that has developed to promote human rights, from an anthropological perspective. Outcomes: Students will be able to demonstrate an understanding of the social and historical origins of the concept of human rights and analyze the debates that arise out of applying the concept of human rights in cross-cultural contexts. Lecture(In person) Components:

Course Equivalents: INTS 308 Room Requirements: General Classroom(1)

ANTH 307(3) Course ID:010270 The Human Body in Cultural Perspective

This course examines the significance and nature of surface and deep culturally originated modifications of the human body. Outcome: The student will demonstrate an understanding of the cultural importance and meaning of body modifications through the use of a cross-cultural perspective on past and contemporary modification practices.

Components: Lecture(In person)

Course ID:010271 04-MAR-2007 ANTH 330(3)

Language in Popular Culture This course will contrast popular ideas about language with scholarly approaches from the fields of linquistic anthropology, linquistics, sociology, ethnic studies, and other disciplines. Outcomes: Students

will demonstrate an understanding of the consequences of linguistic ideology on language policy, language representation and the evaluations of others. Components: Lecture(In person)

ANTH 331(3) Course ID:010266 03-MAR-2007

Writing Systems of the World

This course examines the history, diversity and beauty of the world's writing systems, from ancient to modern. Outcomes: Students will demonstrate an understanding of the origins, structure, and classification of a variety of scripts from around the world.

Components: Lecture (In person)

Course ID:010333 03-MAY-2007

Sacred Texts of China

ASIA 168(3)

Through the study of primary sacred texts of China (in translation), this class will provide a basic understanding of Chinese thought and its historical development. Interconnections among the various periods and different schools of Chinese philosophy such as Confucianism, Taoism, Buddhism and Neo-Confucianism will be demonstrated and discussed from ancient through the medieval and modern periods. Outcomes: Students will be able to demonstrate knowledge of the major Chinese sacred texts and teachings of various religious and philosophical traditions, and how they developed and interacted historically.

Components: Lecture Course Equivalents: THEO 168, INTS 168 Description of the Description Studies

Requirement Group: Restricted to Beijing Students

Course ID:010359 07-MAY-2007

Taoism

ASIA 169(3)

Students will study the history and main ideas and practices of Taoism, meet the sages who wrote the Taoist texts, be introduced to the various schools of Taoist philosophy, and get a feel for what it means to practice Taoism today. The course will illustrate how religious Taoism established a relationship with Confucian thought and practice as well as how at each stage of its historical development, Taoism exerted a profound influence on Chinese politics, economy, culture, art, natural sciences, and social life. Outcomes: Students will be able to demonstrate knowledge of philosophical and religious Taoist beliefs,

practices, and institutions in varied contexts and historical periods. Components: Lecture Course Equivalents: THEO 169, INTS 169 Requirement Group: Restricted to Beijing Students

ASIA 191(3) Course ID:010355 01-AUG-2006 Traditional Chinese Philosophy

Students will investigate Chinese ancient philosophy in a way to let its own tendencies be sensed and appreciated. Topics include Confucianism, Mencius, Sunzi, Taoism, Legalism, Yin-Yang School, Tung Chung-shu, Chinese Buddhism and Neo-Confucianism. In addition, students learn about the relations among different schools or different thinkers in the same school. Comparisons between Chinese philosophies and western ones are encouraged.

Cultural Revolution-China The Geat Proletarian Cultural Revolution (1966-1976) was a watershed in China's modern history. Over the course of a decade, Mao summoned the populace to battle ""bourgeoisie"" of the state by attacking various parts of the social, cultural and political structure. Outcome: Students will examine the Cultural Revolution from the perspectives of political, social, and cultural history, utilizing memoirs, oral histories, documentary and dramatized films, primary documents written by China's party leaders, and scholarly writings; come to understand these events not solely from the hindsight of post-reform China, but from the perspective of the times during which these events unfolded; and develop their own understandings of what these years meant for the shaping of modern China's state, economy, institutions, and citizens.

After a brief introduction to the study of mysticism and the basics of the Islamic religion, students will consider topics including mystical understandings of the Islamic scripture (Qur'an) and the figure of the Prophet Muhammad as well as the ""inner dimensions"" of Islamic ritual practices. In addition, the course will survey the entire tradition of Islamic mysticism (tasawwuf) historically, anthropologically, and through study of the writings (in translation) of prominent Muslim mystics such as al-Ghazzali, Ibn Arabi, and Rumi. Components: Lecture Course Equivalents: THEO 364, INTS 364A, IWS 364 ASIA 365(3) Course ID:010316 19-APR-2007 Women, Gender and Embodiment in Islam This course will consider gender both as articulated in normative Islamic religious and legal systems and as embodied during various historical periods in a range of Muslim societies. Students will read a number of the most important academic studies in this field and consider anthropological and cultural materials including films and short stories that disclose Muslim practices and concepts of maleness, femaleness, and gender relations. Components: Lecture Course Equivalents: WOST 365, THEO 365, INTS 304, WSGS 365 06-MAY-2007 ASIA 366(3) Course ID:010345 Department Consent Required Contemporary Islamic Thought and Movements This course will consider contemporary Islamic thought and movements world-wide. After a brief introduction to Islam and the historical development of the tradition up to the present, students will learn about a range of contemporary Muslim intellectual and activist movements and thinkers through the study of original writings and secondary analysis. Some major figures to be considered include: Syed Maududi, Sayyid Qutb, Fazlur Rahman, and other Muslim intellectuals representing movements such as Jama'at-i Islami, the Muslim Brotherhood, and Islamic liberalism. We will focus on the 20th century up to the most current trends. Some of the theological and social issues that will be discussed are gender, the ideal political order, Islamic law and its role in society, and pluralism. Components: Lecture Course Equivalents: PSYC 305 Room Requirements: General Classroom(1) BIOL 242(4) Course ID:010724 30-JUN-2008 Human Structure and Function I Pre-requisites: BIOL 101,111,102,112 and CHEM 101,102,111,112. Lecture, laboratory, and demonstrations. Organization of the human body from the cellular to the organismal level. Anatomy of body systems and their physiology related to 1) support and movement (integumentary, skeletal and muscular systems) and integration and control (nervous and endocrine systems). Dissection of representative organs is required. Prerequisites are BIOL 101, 102, 111,112 and CHEM 101, 102, 111, 112. Outcomes: Students will be able to demonstrate knowledge of human anatomy at the microscopic and gross levels. They will be able to correlate structure and function and will have a firm understanding of the organizing principle of human physiology, homeostasis and explain the role of the nervous and endocrine systems in its maintenance. Components: Laboratory(In person), Lecture Requirement Group: Pre-requisites: BIOL 101, 111, 102, 112, and CHEM 101, 102, 111, 112, grade of C- or above. Room Requirements: Electronic Classroom(1) BIOL 243(4) Course ID:010725 30-JUN-2008 Human Structure and Function II Pre-requisite: BIOL 242. Lecture, labratory and demonstrations. A continuation of BIOL 242. Anatomy of body systems and their physiology related to 1) regulation and maintenance (cardiovascular, lymphatic respiratory, digestive and urinary systems) and reproduction and development (male and female reporductive systems.) Dissection of representative organs is required. Prerequisites are BIOL 101, 102, 111, 112, BIOL 242 and CHEM 101, 102, 111, 112. Outcomes: Students will be able to demonstrate a comprehansive integrated knowledge and understanding of human anatomy and physiology at all levels. Components: Laboratory (In person), Lecture (In person) Requirement Group: Pre-requisite: BIOL 242. Room Requirements: Electronic Classroom(1) BIOL 251(3) Course ID:001307 15-MAR-2006 Cell Biology Prerequisites: BIOL 102, 112 and CHEM 102 or 106. This course covers basic molecular and cellular studies

of living organisms, emphasizing the relationships between subcellular structures and biochemical and physiological functions of cells. Outcome: Students will become familiar with a wide range of cell biological principles and experimental approaches that led to important discoveries, gain an appreciation of the scientific method, and learn about the goals of modern cell biology research.

Course ID:001326 01-JAN-1901 BIOL 313(3) Lab in Psychobiology Prerequisites: BIOL 102, 112, PSYC 306, and PSYC 240 or 305. A ¿hands on¿ experience with the instrumentation, measurement techniques and experimental designs used in electrophysiological studies of nervous system function. Components: Laboratory Course Equivalents: PSYC 311 Requirement Group: Pre-requisite: BIOL 102 and 112. Room Requirements: Lab - Biology(1) BIOL 314(3) Course ID:001327 15-MAR-2006 Advanced Microbiology Prerequisites: BIOL 282, 302 and CHEM 224. Concepts of microbial life, physiology, biochemistry and immunology. Topics covered include microbial methods, nature, metabolism, biosynthesis, environmental effects and differences among microorganisms. Outcome: Students will examine and comprehend a number of the

immunology. Topics covered include microbial methods, nature, metabolism, biosynthesis, environmental effects and differences among microorganisms. Outcome: Students will examine and comprehend a number of the divergent processes that microbes fuel in nature as well as the interactions between microbes and their environments, including the human host.

Components: Lecture

Room Requirements: General Classroom(1)

BIOL 315(4) Course ID:001328 15-MAR-2006

Introductory Immunology Lec/Lab Prerequisites: BIOL 251, 282 The study of the nature and molecular basis of immune responses. History and vocabulary of immunology; experiments involving immune recognition and destruction; theories regarding self-tolerance and immunological diseases. Outcome: Students will learn the morphology and histology of the cells involved in an immune response, as well as how the cells develop and the molecular mechanisms used to recognize and eliminate non-self material. The students will become familiar with the evasion strategies of pathogens and the consequences associated with either hyper or hypo-responsiveness.

Components:Laboratory, LectureRequirement Group:Pre-requisite: BIOL 251 and BIOL 282.Room Requirements:Electronic Classroom(1)

Course ID:001330 15-MAR-2006

Limnology Lec/Lab

BIOL 316(4)

Prerequisites: BIOL 265 and CHEM 102 or 106. An introduction to the structure and function of lake and stream ecosystems. The course includes the integration of physical, chemical, and biological parameters. Laboratories include weekend field trips to aquatic habitats. Outcome: Students will learn methods of sampling and analyzing physical, chemical and biological factors in lake and stream ecosystems, and how to integrate these complex data sets to answer ecosystem process-level questions. Students will learn to evaluate the trophic status and health of a lake by the end of the course.

Components:Laboratory, LectureRequirement Group:Pre-requisite: BIOL 265 and CHEM 102 or 106.Room Requirements:Electronic Classroom(1)

BIOL 317(3) Course ID:001332 15-MAR-2006

Biology of Persistent Disease

Prerequisites: BIOL 282, 302 and CHEM 224 or permission of instructor. Fundamentals of microbe-host interactions and microbial diseases. Microbial mechanisms of pathogenicity are examined. There are also in-depth readings and discussion of specific microbial diseases. Outcome: A literature examination will be done in order that the manner by which microbes interact, and cause pathogenesis, with their hosts will be attained. A number of the varied strategies that microbes use to successfully colonize their hosts will be understood.

Components: Lecture Room Requirements: General Classroom(1)

Course ID:001334 15-MAR-2006

BIOL 319(3) Evolution

Prerequisite: BIOL 282; BIOL 265 recommended This course focuses on analysis of processes and patterns of evolution. Topics include population genetic principles, fossil patterns and geologic ages, phylogenetic analysis of relationships of species, experimental approaches to evolutionary questions, and evolutionary perspectives on human biology and relationships. Outcome: Students will develop knowledge and awareness of evolutionary processes and patterns, the evidence for them, and how evolutionary hypotheses are tested experimentally. They will develop an appreciation of the primary literature through reading and discussing research articles.

BWS 202(3) Course ID:009887 18-MAR-2006

Culture, Identity and Performance This course examines the beliefs, values, sub-cultural traditions and performance of identity(ies) typically associated with persons of African heritage in various areas and contexts across the African world. Each of these elements of Black/Africana culture will be viewed through the lenses of social science, literature and other articulations and postulations which attempt to name and characterize these populations, historically and contemporarily in print and electronic media, filmic and popular cultural discourses. This interdisciplinary approach will engage early black film, ethnography, slave narratives, performance and performance theory as tools to unpack multiple contested ideas, beliefs and ideologies concerning the nature of black self-identity and expression.

Students study how the technology of scuba diving combined with scientific archaeology has created a new discipline of shipwreck archaeology since the 1960s. They follow the history of the discipline and explore shipwrecks from Bronze Age Greece to nineteenth-century Chicago. Outcome: Students understand the iportance of vessels conserved at Skuldelev, Lake Nemi and Uluburun for tracing the development of commerce and technology among the Vikings, the Romans, and the Syro-Palestinians of the Levant. They synthesize the research and conclusions of nautical archaeologists worldwide and organize those findings for presentation to a broader public in the coherent and imaginative form of their own Museum.

Components: Lecture(In person) Course Equivalents: HIST 324, MSTU 330, ANTH 347 Room Requirements: General Classroom(1)

Media, Politics & Propaganda

Rhet Soc Change: Agit & Resist

CMUN 337(3) Course ID:002130 15-MAR-2006

Prerequisite: CMUN 150 or 160 Agitation and Resistance: This course explores the communication strategies and practices used to promote significant socio-political change, and those used to resist such change. Outcome: Students will demonstrate an understanding of the strategies and practices used in particular social struggles and of recurrent rhetorical strategies employed in agitation and resistance.

Components: Lecture

Room Requirements: General Classroom(1)

CMUN 348(3) Course ID:002133 16-OCT-2007 Cmun Research Methods Topics

Prerequisites: CMUN 150, 160 and permission of instructor Advanced courses that offer in-depth discussion of a specialized area of communication research methods that include naturalistic, quantitative and journalistic research methods. May be repeated for a total of 9 hours, but only 3 may count toward fulfilling the methods requirement and only another 3 may count as electives toward the major. Outcome: Students have the opportunity to broaden their research methods skills in several specialized areas.

12-MAR-2006 COMP 101(1) Course ID:002160 Exploring the Internet How to take one's place on the internet - using and developing web resources. Outcome: Students will be able to establish their own web resources. Components: Laboratory(In person) Room Requirements: Lab - Computer(1) COMP 102(3) Course ID:002161 15-MAR-2006 Web Design and Multimedia Publishing This course introduces foundations of the world wide web technology, HTML, and multimedia publishing techniques. Topics include HTML syntax, CSS, XML, RSS, and various multimedia formats. Outcome: An understanding of the technologies behind web sites and the ability to use them effectively. Lecture(In person) Components: Room Requirements: Lab - Computer(1) COMP 104(3) Course ID:009795 15-MAR-2006 Computer Animation The course introduces techniques for understanding and developing dynamic and interactive media by using sound, motion, images, and text. Relevant software knowledge areas are covered. Outcome: ability to publish created animated media projects to the web in a process that involves understanding human interface design. Lecture(In person) Components: Room Requirements: Lab - Computer(1) COMP 111(3) Course ID:009860 01-AUG-2007 History of Computing The social and organizational history of humanity is intricately entangled with the history of technology in general and the technology of information in particular. Advances in this area have often been closely involved in social and political transformations. While the contemporary period is often referred to by such names as the Computing and Information Age, this is the culmination of a series of historical transformations that have been centuries in the making. This course will provide a venue for students to learn about history through the evolution of number systems and arithmetic, calculating and computing machines, and advanced communication technology via the internet. Components: Lecture(In person) Attributes: CORE Historical Knowledge Room Requirements: Lab - Computer(1) COMP 120(3) Course ID:002162 15-MAR-2006 Intro to Computer Applications Prerequisite: MATH 100 or equivalent. This course, intended for non-science majors, offers a hands-on introduction to the development, functions, and applications of computers. It includes weekly lab assignments. Outcome: Experience with Internet tools, desktop publishing, spreadsheets, databases, statistical packages, and some programming, and with applications to business and the arts; an understanding of ethical, security, and privacy issues relating to computers and the Internet. Components: Laboratory(In person) Course Equivalents: MATH 149 Room Requirements: Lab - Computer(1) COMP 125(3) Course ID:002163 01-AUG-2007 Visual Information Processing This course, intended primarily for non-majors, provides an introduction to computer programming using a language well-suited to beginning programmers and practical applications, e.g., Visual Basic.Net. Outcome: Understanding of computer mechanisms for representing and analyzing numerical and logical information and the power of programmability; practical ability to implement useful computing tools. Components: Laboratory(In person) Attributes: CORE Quantitative Reasoning **Room Requirements:** Lab - Computer(1) COMP 150(3) Course ID:002164 15-MAR-2006 Introduction to Computing The world overflows with electronic data. This course introduces programming in a simple, powerful language like Python, with selection, repetition, functions, graphical effects, and dynamic interaction with the Internet, plus connections to lower level computer organization and computer implications in the wider world. Outcome: Empowerment to manage and transform masses of data; understanding of technical, societal, and ethical issues involved.

Course ID:009646 05-NOV-2007 COMP 264(3) Introduction to Computer Systems Prerequisite: COMP 170. This course studies the hierarchy of abstractions and implementations that constitute a modern computer system, with a particular focus on issues of interest to programmers, typically including some systems programming instruction. Outcome: Understanding of system issues that affect the performance, correctness, or utility of user-level programs. Components: Lecture Requirement Group: Pre-requisite: COMP 170. COMP 266(3) Course ID:002173 01-JAN-1901 Digital Electronics Lab Components: Laboratorv Course Equivalents: PHYS 266 COMP 271(3) Course ID:002174 11-NOV-2006 Data Structures: Algorithms and Applications Prerequisite: COMP 170. This course introduces key data structures such as lists, sets, and maps, as well as their implementations. Performance and analysis of algorithms are covered along with applications in sorting and searching. Outcome: Students will learn to design new data structures as well as learn to use existing data structures in applications. Components: Laboratory, Lecture Requirement Group: Pre-requisite: COMP 170. Room Requirements: General Classroom(1) Course ID:002176 15-JUN-2006 COMP 272(3) Abstract Data Structures & OOP Prerequisite: COMP 271. Object-orientation continues to be a dominant approach to software development. This intermediate programming-intensive course studies the use of classes and objects with an emphasis on collaboration among objects. Outcome: A thorough understanding of the principles of object-orientation: abstraction, delegation, inheritance, and polymorphism; exposure to basic design patterns; programming experience in mainstream object-oriented languages such as C++ and Java. Components: Lecture Course Equivalents: COMP 313 Requirement Group: Pre-requisite: COMP 271 Room Requirements: General Classroom(1) Course ID:002180 COMP 288(1 - 3) 01-JAN-1901 Computer Science Topics Components: Lecture Room Requirements: General Classroom(1) COMP 300(3) Course ID:009419 15-MAR-2006 Data Warehousing and Data Mining Prerequisite: Comp 170 This course covers theory and practice of extremely large information storage (warehousing) and analysis (mining) mechanisms. With data growing at exponential rates knowledge gathering Outcome: Students will be able and exploration techniques are essential for gaining useful intelligence. to define and critically analyze data warehouse and mining approaches for fields such as security, forensics, privacy, and marketing. Components: Lecture(In person) Room Requirements: Lab - Computer(1) COMP 300X(0 - 12) Course ID:002181 01-JAN-1901 TBA - Foreign Study Components: Lecture 15-MAR-2006 COMP 305(3) Course TD:009417 Database Administration Business and scientific institutions increasingly use large commercial data base systems. This course teaches the theory and practice for the definition, security, backup, tuning, and recovery of these systems. Outcome: Students will be able to use theory and pragmatic approaches to define and implement realistic solutions for large database administration environments. Lecture (In person) Components: Room Requirements: Lab - Computer(1)

Topics to be addressed include licensing, Linux, typical software development tools, applications, and techniques for managing remote servers. Outcome: Students will learn to implement projects involving Free and Open Source software and learn how to participate in open-source projects effectively. Components: Lecture (In person) **Room Requirements:** Electronic Classroom(1) COMP 313(3) Course TD:009966 15-JUN-2006 Intermediate Object-Oriented Development Prerequisite: COMP 271. Object-orientation continues to be a dominant approach to software development. This intermediate programming-intensive course studies the use of classes and objects with an emphasis on collaboration among objects. Outcome: A thorough understanding of the principles of object-orientation: abstraction, delegation, inheritance, and polymorphism; exposure to basic design patterns; programming experience in mainstream object-oriented languages such as C++ and Java. Lecture(In person) Components: Course Equivalents: COMP 272 Room Requirements: Lab - Computer(1) 04-JAN-2007 COMP 314(1) Course ID:010224 Problem Solving Strategies I Prerequisite: COMP 271. This course allows students to sharpen problem-solving skills along with, or as part of, the ACM Programming Team. Groups generally work on old competition problems on alternate weekends, with short follow-ups during the next week. Outcome: Ability to work in small groups, quickly and accurately assessing and solving focused problems involving many sorts of programming knowledge. Components: Seminar(In person) Room Requirements: General Classroom(1) COMP 315(2) Course TD:010232 20-AUG-2007 Problem Solving Strategies II Prerequisite: Comp 314 This course allows students to sharpen problem-solving skills along with, or as part of, the ACM Programming Team. Groups generally work on old competition problems on alternate weekends, with short follow-ups during the next week. Outcome: Ability to lead n a small group, quickly and accurately assessing and solving focused problems involving many sorts of programming knowledge. Components: Seminar(In person) Room Requirements: Electronic Classroom(1) COMP 316(1 - 2) 01-JAN-1901 Course ID:002183 Ethics & Computers Components: Seminar Requirement Group: Pre-requisite: COMP 170 & PHIL 120. **Room Requirements:** Seminar(1) COMP 317(3) Course ID:009773 03-MAY-2006 Social, Legal, and Ethical Issues in Computing This course covers social, legal, and ethical issues commonly arising in key areas related to computing technologies. Outcome: Understanding of laws and issues in areas such as privacy, encryption, freedom of speech, copyrights and patents, computer crime, and computer/software reliability and safety; understanding of philosophical perspectives such as utilitarianism versus deontological ethics and basics of the U.S. legal system. Components: Lecture (In person) Room Requirements: General Classroom(1)

College of Arts and Sciences - Computer Science - Subject: Computer Science

Course ID:010768 01-JUL-2008 COMP 319(1) Introduction to UNIX Prerequisite: COMP 170. An introduction to the UNIX operating system. Topics include files and directories, electronic mail, security, advanced file systems, network utilities, network file sharing, text utilities, shell programming, UNIX internals, UNIX system administration (essentials), the X windowing system, systems programming, and secure shell (SSH). Outcome: After taking this course, students will develop working knowledge of Unix and be able to use modern Unix operating systems such as Linux, OS X, or Solaris. Components: Laboratorv Room Requirements: Lab - Mathematics(1) COMP 320(3) Course ID:009416 05-NOV-2007 Software Systems Analysis Pre-requisite: COMP 163 and 170 or Instructor Approval. Software systems analysis and design document user needs, create system architecture, and guide implementation. This course teaches the Unified Modeling Language (UML), and uses current software tools for analysis and design. Outcome: Students will be able to use techniques of analysis and design, document results using UML, and understand how to communicate in team-oriented settings. Lecture(In person) Components: Requirement Group: Pre-requisites: COMP 163 and 170. Room Requirements: Lab - Computer(1) COMP 328(3) Course ID:010327 01-MAY-2007 Algebraic Coding Theory Codes with algebraic structure for error control are examined. Block codes including Hamming codes and Reed-Muller codes, BCH codes, and other cyclic codes with algebraic structure and other cyclic codes and their implementation are treated. Other topics may include: convolutional codes, effciency considerations, and Shannon's fundamental theorem of information theory. Lecture(In person) Components: Course Equivalents: MATH 328 **Room Requirements:** General Classroom(1) COMP 330(3) Course ID:002184 15-NOV-2006 Software Engineering Prerequisite: COMP 272. Students learn real-world theory and techniques organizations use to create high-quality software on time. Students work on a large programming team to create plans, review progress, measure quality, and make written and oral analyses of their project. Outcome: Students will experience process based development, understand the dynamics of a professional software organization, and develop skills for implementing software with others. Lecture Components: Requirement Group: Pre-requisites: COMP 271 or COMP 272. Room Requirements: General Classroom(1) Course ID:002185 15-MAR-2006 COMP 331(3) Cryptography Prerequisite: COMP 363 or MATH 313 or 322. This course introduces the formal foundations of cryptography and also investigates some well-known standards and protocols, including private and public key cryptosystems, hashing, digital signatures, RSA, DSS, PGP, and related topics. Outcome: Students will gain an understanding of cryptosystems widely used to protect data security on the internet, and be able to apply the ideas in new situations as needed. Components: Lecture(In person) Course Equivalents: MATH 331 Requirement Group: Pre-requisite: COMP 363, MATH 313, or MATH 322. COMP 333(3)

Formal Methods in Software Engineering Prerequisite: Comp 313 As embedded and networked systems are becoming ever more ubiquitous, we depend increasingly on the correctness of the software that controls such systems. This course studies the formal specification, verification, and synthesis of software. Outcomes: An understanding of the role of formal methods in the construction of software systems; proficiency in representative methods and tools, such as UML and ESC.

Components: Lecture Room Requirements: General Classroom(1)

COMP 336(3) Course ID:009582 05-NOV-2007

Course ID:002187

Markup Languages

Pre-requisite: COMP 313. This course is concerned with XML and its various component frameworks. The core frameworks to be covered include Document Object Model (DOM), Simple API for XML processing (SAX), the XML Path language (XPath), and XSLT. Outcome: After taking this course, students will have working knowledge of XML and its connections to other ideas such as HTML, object models, relational databases, and network services.

Components:Lecture(In person)Requirement Group:Pre-requisite: COMP 313.Room Requirements:Lab - Computer(1)

COMP 337(3) Course ID:002188 15-MAR-2006

Introduction to Concurrency

Prerequisite: Comp 313. Many real-world software systems rely on concurrency for performance and modularity. This programming-intensive course covers analysis, design, implementation, and testing of concurrent software systems. Outcome: An in-depth understanding of event-based and thread-based views of concurrency; the ability to develop concurrent software components using suitable languages, frameworks, and design patterns; familiarity with object-oriented modeling and development tools and test-driven development. Components: Lecture

Room Requirements: General Classroom(1)

COMP 338(3)Course ID:00218928-NOV-2007Server-based Software DevelopmentPrerequisite:COMP 313Server-based web applications and services have become part of everyday life.This programming-intensive course covers analysis, design, implementation, and testing of multi-tieredserver-based software systems along with typical tier-specific technologies.Outcome: An understanding ofsoftware architecture and integration in the development of multi-tiered server-based software; familiaritywith object-oriented modeling and development tools and test-driven development.Components:Lecture

Requirement Group: Pre-requisite: COMP 337. Room Requirements: General Classroom(1)

COMP 339(3) Course ID:009583 28-NOV-2007

Distributed Programming

Computer Forensics

Prerequisite: Comp 313. This course covers topics in modern distributed systems. This course places special emphasis on scalability (performance), reliability/fault tolerance, and security. Outcome: After taking this course, students should understand the essential ingredients of distributed systems and how to build distributed systems that are resilient to transient network failures and other potential anomalies. Components: Lecture(In person)

Room Requirements: Lab - Computer(1)

COMP 340(3) Course ID:010307 15-APR-2007

The course introduces the fundamentals of computer/network/internet forensics, analysis and investigations. Outcome: The student will learn computer software and hardware relevant for analysis, and investigative and evidence-gathering protocols. Components: Lecture(In person)

Room Requirements: Electronic Classroom(1)

COMP 343(3) Course ID:002190 28-NOV-2007

Intro to Computer Networks

Prerequisite: Comp 271. This course surveys packet-switched computer networks and attendant communication protocols, using the TCP/IP protocol suite on which the Internet is based as the primary model. Some Java programming is required. Outcome: Students will understand how the Internet is constructed, how data is routed to its destination, how connections are made, how congestion is handled, and how security can be addressed.

Components: Lecture Room Requirements: General Classroom(1)

Course ID:009709 15-MAR-2006 COMP 422(3) Software Development for Wireless and Mobile Devices This course will focus on the methods, tools, and technologies for developing software applications for wireless and mobile devices, such as personal digital assistants (PDA) and smart mobile phones. Outcome: Students will learn user interface design for small screens, programming techniques for devices with limited memory and processing power, data synchronization for mobile databases, and wireless network programming. Components: Lecture (In person) Requirement Group: Restricted to Graduate School students. Room Requirements: General Classroom(1) COMP 423(3) Course ID:002220 15-MAR-2006 Combinatorial Mathematics The course covers basic combinatorial theory including permutations and combinations, the inclusion-exclusion principle and other general counting techniques, partitions, generating functions, recurrence relations, Burnside's Theorem, the cycle index, and Polya's formula. Outcome: Students will learn mathematical techniques in discrete mathematics and applied combinatorics. Components: Lecture Course Equivalents: MATH 423 Requirement Group: Restricted to Graduate School students. Room Requirements: General Classroom(1) COMP 424(3) Course ID:009710 15-MAR-2006 Client-Side Web Design This course provides an in-depth study of the concepts and methods required for the design and implementation of the presentation layer of a web application. Coursework includes several substantial programming projects. Outcome: Students will learn markup of static and dynamic content, content transformation, client-side executable content including client-side scripting and embedded applets, and web-based content management systems. Lecture(In person) Components: Requirement Group: Restricted to Graduate School students. **Room Requirements:** General Classroom(1) COMP 428(3) Course ID:002221 15-MAR-2006 Algebraic Coding Theory In this course, major types of error-correcting codes, encoding and decoding, and their main properties will be studied. The codes examined will include the Hamming, Golay, BCH, cyclic, quadratic residue, Reed-Solomon, and Reed-Muller codes. Outcome: Students will learn both the theory and application of error-correcting codes. Components: Lecture Course Equivalents: MATH 428 Requirement Group: Restricted to Graduate School students. Room Requirements: General Classroom(1) COMP 431(3) Course ID:002222 15-MAR-2006 Cryptography This course introduces the formal foundations of cryptography and also investigates some well-known standards and protocols, including private and public key cryptosystems, hashing, digital signatures, RSA, DSS, PGP, and related topics. Outcome: Students will gain an understanding of cryptosystems widely used to protect data security on the internet, and be able to apply the ideas in new situations as needed. Components: Lecture Course Equivalents: MATH 431 Requirement Group: Restricted to Graduate School students. **Room Requirements:** General Classroom(1) COMP 432(3) Course ID:002223 01-JAN-1901 Design Patterns & Obj-Or Designs Components: Lecture Requirement Group: Restricted to Graduate School students. Course ID:009711 15-MAR-2006 COMP 433(3) Web Services Programming Web services are Web-based enterprise applications that use open, XML-based standards and transport protocols to exchange data with calling clients. This course provides the APIs and tools you need to create and deploy interoperable Web services and clients using .NET and Java WSDP. Outcome: Students will learn the standards and protocols for deploying web services. Lecture(In person) Components: Requirement Group: Restricted to Graduate School students. Room Requirements: General Classroom(1) COMP 434(3) Course ID:009712 15-MAR-2006 Enterprise Software Development The course shows how to use Enterprise JavaBeans to develop scalable, portable business systems. The technologies taught in the course include: component models, distributed objects, asynchronous messaging, and component transaction monitors. Outcome: Students will learn the architecture of EJB, entity and message and session beans. Components: Lecture (In person) **Room Requirements:** General Classroom(1) COMP 436(3) Course ID:009713 15-MAR-2006 Markup Languages This course is concerned with XML and its various component frameworks. The core frameworks to be covered include Document Object Model (DOM), Simple API for XML processing (SAX), the XML Path language (XPath), and Outcome: After taking this course, students will have working knowledge of XML and its connections XSLT. to other ideas such as HTML, object models, relational databases, and network services. Components: Lecture (In person) Requirement Group: Restricted to Graduate School students. Room Requirements: General Classroom(1) COMP 437(3) Course ID:002224 15-MAR-2006 Intro Concurrent Programming Many real-world software systems rely on concurrency for performance and modularity. This programming-intensive course covers analysis, design, implementation, and testing of concurrent software svstems. Outcome: An in-depth understanding of event-based and thread-based views of concurrency; the ability to develop concurrent software components using suitable languages, frameworks, and design patterns; familiarity with object-oriented modeling and development tools and test-driven development. Components: Lecture Requirement Group: Restricted to Graduate School students. Room Requirements: General Classroom(1) Course ID:009714 COMP 439(3) 15-MAR-2006 Distributed Systems This course presents a modern discussion of distributed computing systems. Distributed computation, interactive services, collaborative computing, peer-to-peer sharing, and grid/utility computing are just a handful of distributed technologies that go beyond the capabilities of the traditional client/server model by allowing a collection of computers to be leveraged as a collective resource. Outcome: Students will learn design and implementation, scalability of performance, reliability, and security of loosely interconnected systems. Lecture (In person) Components: Room Requirements: General Classroom(1) Course ID:009722 15-MAR-2006 COMP 441(3) Human-Computer Interface Design This course studies the interaction between humans and computer-based systems. The course will provide students with the methods for evaluating, designing, and developing better interfaces between humans and svstems. Outcome: Students will acquire an awareness of different design and evaluation methods as well as practical, effective, and cost-conscience methods for improving systems and their interfaces.

Course ID:009723 15-MAR-2006 COMP 442(3) Server-Side Software Development Server-based web applications and services have become part of everyday life. This programming-intensive course covers analysis, design, implementation, and testing of multi-tiered server-based software systems along with typical tier-specific and technologies. Outcome: An understanding of software architecture and integration in the development of multi-tiered server-based software; familiarity with object-oriented modeling and development tools and test-driven development. Components: Lecture(In person) Requirement Group: Restricted to Graduate School students. Room Requirements: General Classroom(1) COMP 443(3) Course ID:002225 15-MAR-2006 Computer Networks This course surveys packet-switched computer networks and attendant communication protocols, using the TCP/IP protocol suite on which the Internet is based as the primary model. We will also study general high-level network issues such as security, authentication, fault tolerance, and congestion. Outcome: Students will understand how the Internet is constructed, how data is routed to its destination, how connections are made, how congestion is handled, and how security can be addressed. Components: Lecture Requirement Group: Restricted to Graduate School students. Room Requirements: General Classroom(1) COMP 446(3) Course ID:009715 15-MAR-2006 Telecommunications This course introduces the fundamental concepts of telecommunication networks. Underlying engineering principles of telephone networks, computer networks and integrated digital networks are discussed. Outcome: Students will learn how telephone and data networks work. They will also learn voice networks, analog versus digital transmission, data link protocols, SONET, ATM, cellular phone systems, and the architecture of the current telephone system. Components: Lecture(In person) Room Requirements: General Classroom(1) COMP 447(3) Course ID:009716 15-MAR-2006 Intrusion Detection and Computer Forensics This course will cover techniques for detecting the unusual usage patterns that typically signal a break-in. The course will also consider differences in detection of local intruders versus intrusion over networks. Finally issues in the prosecution of those breaking in to computers, particularly evidentiary issues are explored. Outcome: Students will learn to configure ID systems (eg., snort) and analyze their output. They will also understand both network-based and host-based monitoring techniques. Lecture(In person) Components: Room Requirements: General Classroom(1) COMP 448(3) Course ID:009717 15-MAR-2006 Network Security This course will involve a discussion of the methods and tactics used to keep attackers at bay as well as the mechanisms by which we can identify and potentially stop potential intruders. The course covers topics such as Encryption, authentication, firewalls, NAT/PAT, restricted access policies, intrusion detection and other security frameworks. Outcome: Students will gain an understanding of how to secure computers and network environments. Components: Lecture(In person) Room Requirements: General Classroom(1) COMP 449(3) Course ID:009718 15-MAR-2006 Wireless Networking and Security This course will explore the wireless standards, authentication issues, common configuration models for commercial versus institution installs and analyze the security concerns associated with this ad-hoc method of networking. Outcome: Students will gain an understanding of wireless networking, protocols, and standards and security issues. Lecture(In person) Components: Requirement Group: Restricted to Graduate School students. Room Requirements: General Classroom(1) COMP 450(3) Course ID:002226 01-JAN-1901 Microprogramming & Microprocss Components: Lecture Requirement Group: Restricted to Graduate School students. Course ID:009719 15-MAR-2006 COMP 453(3) Database Programming This course will cover advanced concepts in database access and programming including SQL, JDBC, SQLJ, JSP and servlets. Oracle 10g is used for projects. Outcome: Students will learn application development using the latest software tools. Students will also learn techniques for web based data retrieval and manipulation. Components: Lecture(In person) Requirement Group: Restricted to Graduate School students. **Room Requirements:** General Classroom(1) COMP 460(3) Course ID:002227 15-MAR-2006 Algorithms & Complexity This course will focus both on presenting general techniques for designing correct and efficient algorithms, as well as on formal methods for proving the correctness and analyzing the complexity of such algorithms. Outcome: Students learn: the ability to design and analyze efficient algorithms; understanding of the necessary models and mathematical tools; understanding of a variety of useful data structures and fundamental algorithms; exposure to the classification of computational problems into different complexity classes. Lecture Components: Requirement Group: Restricted to Graduate School students. Room Requirements: General Classroom(1)

Course ID:002228 15-MAR-2006 COMP 462(3)

Advanced Computer Architecture

This course presents key principles underlying the design of modern digital computers. The course introduces quantitative techniques used to guide the design process. It describes CPU performance issues and introduces instruction set architectures. The course then uses a hypothetical computer design, with a simple RISC architecture, to show how modern digital computers are implemented, first using a simple non-pipelined implementation, followed by a higher-performance pipelined implementation. Outcome: Students gain an understanding of the design of the memory hierarchy in modern digital computers, caching and virtual storage techniques, multiprocessor systems, and distributed shared memory systems.

Components: Lecture Requirement Group: Restricted to Graduate School students. Room Requirements: General Classroom(1)

COMP 464(3) Course ID:002229 15-MAR-2006

High-Performance Computing

This course will use a blend of foundational understanding as well as a set of practical tools to gain insight into performance engineering of software. The course introduces techniques to gain performance boost in Java programs and C++ (or C) programs by discussing the use of multiple processors. Outcome: Students will learn shared memory, message passing and hybrid models of programming in both tightly-coupled and loosely-coupled computer systems.

Components:	Lecture
Requirement Group:	Restricted to Graduate School students.
Room Requirements:	General Classroom(1)

COMP 468(3) Course ID:002230 15-MAR-2006 Database System Design

The course covers both relational and object databases. Issues of physical storage and use of indexes as well as optimization of queries are discussed. The course also covers transaction processing, concurrency, data warehousing, data mining, and distributed databases. Outcome: Students learn the theory and practice of advanced database design and implementation. They will also gain an understanding of using commercial database environments such as Oracle. Components: Lecture

College of Arts and Sciences - Computer Science - Subject: Computer Science

Course ID:002232 15-MAR-2006 COMP 472(3) Compiler Construction This course covers the basics of writing a compiler to translate from a simple high-level language to machine code. Topics include lexical analysis, top-down and LR parsing, syntax-directed translation, and code generation and optimization. Students will write a small compiler. Outcome: Students will learn the theory and practice of how to build a compiler. Lecture Components: Requirement Group: Restricted to Graduate School students. **Room Requirements:** General Classroom(1) COMP 473(3) Course ID:002233 15-MAR-2006 Object-Oriented Programming Object-orientation continues to be a dominant approach to software development. This advanced programming-intensive course studies object-oriented analysis, design, and implementation from a design patterns perspective. Outcome: Proficiency in the use of object-oriented languages, frameworks, and patterns; advanced understanding of key language mechanisms such as delegation, inheritance, polymorphism, and reflection; familiarity with object-oriented modeling and development tools and test-driven development. Components: Lecture Requirement Group: Restricted to Graduate School students. Room Requirements: General Classroom(1) COMP 474(3) Course ID:002234 15-MAR-2006 Software Engineering The course discusses real-world theory and techniques organizations use to create high-quality software on time. Students work on a large programming team to create plans, review progress, measure quality, and make written and oral analyses of their project. Outcome: Students will experience process based development, understand the dynamics of a professional software organization, and develop skills for implementing software with others. Components: Lecture Requirement Group: Restricted to Graduate School students. **Room Requirements:** General Classroom(1) COMP 475(3) Course ID:009720 23-MAY-2005 System Standards and Requirements Components: Lecture(In person) Room Requirements: General Classroom(1) COMP 476(3) Course ID:002235 15-MAR-2006 Automata & Formal Languages This course introduces formal language theory, including such topics as finite automata and regular expressions, pushdown automata and context-free grammars, Turing machines, undecidability, and the halting problem. Outcome: An understanding of the theoretical underpinnings of computability and complexity in computer science. Components: Lecture Course Equivalents: MATH 476 Requirement Group: Restricted to Graduate School students. Room Requirements: General Classroom(1) COMP 477(3) Course ID:009721 15-MAR-2006 IT Project Management This course is an introduction to the philosophy and practice of project management. The course involves a student group project to investigate and plan a 'real world' IT project that specifies project objectives, schedules, work breakdown structure, and responsibilities, an written interim report, and a final oral and written report. Outcome: Students will learn time management, work-flow management, and team dynamics to design, implement and test large-scale software projects. Components: Lecture (In person) Room Requirements: General Classroom(1) COMP 478(3) Course ID:002236 01-JAN-1901 Operations Rsrch Topics Components: Lecture Requirement Group: Restricted to Graduate School students. College of Arts and Sciences - Computer Science - Subject: Computer Science and Education

Course ID:009702 15-MAR-2006 CSED 301(3) Introduction to Programming/CS This course provides an introduction to programming with an overview of other topics in computer science. Outcome: Basic programming skills in a computer language such as VB.NET or Logo that may be suitable for teaching to young programmers; understanding of other fundamentals of how computer hardware and software tools work. Components: Lecture (In person) Room Requirements: General Classroom(1) CSED 317(3) Course ID:009704 15-MAR-2006 Social Issues in Computing This course covers social, legal, and ethical issues commonly arising in key areas related to computing technologies. Outcomes: Understanding of laws and issues in areas such as privacy, encryption, freedom of speech, copyrights and patents, computer crime, and computer/software reliability and safety; understanding of philosophical perspectives such as utilitarianism versus deontological ethics and basics of the U.S. legal system. Components: Lecture (In person) Room Requirements: General Classroom(1) CSED 330(3) Course ID:009703 15-MAR-2006 Tech Admin PC Clusters This course covers technical knowledge and practical skills needed to administer a PC cluster in a school or similar environment, focusing on security issues such as firewalls, viruses, and external and internal attacks, and also covers server and LAN configuration and storage management. Outcome: Students will be familiar with the procedures and design tradeoffs involved in configuring a computer lab. Components: Laboratory(In person) Room Requirements: Lab - Computer(1) CSED 331(3) Course ID:009700 15-MAR-2006 Management of PC Cluster Further topics in management of school-based PC clusters are covered: purchasing, staffing, troubleshooting, configuration, copyright and software licensing, facilities and resource management, use of IT outsourcing, acceptable-use policies, account management, content filtering, and reliability. Outcome: Students will be familiar with issues and conflicts, both technical and social, that arise in school lab management, and with ways of addressing them. Laboratory(In person) Components: Room Requirements: Lab - Computer(1) CSED 343(3) Course ID:009701 14-JUL-2005 Introduction to Computer Networks How a computer network is put together, from lowest to highest levels. TCP/IP protocols and the construction of the internet; LAN protocols such as Ethernet and ATM; internetworking protocols such as IP; transit protocols such as TCP and UDP; congestion and security issues. College of Arts and Sciences - Criminal Justice & Criminology - Subject: Criminal Justice

Course ID:002371 15-MAR-2006 CRMJ 308(3)

This course will explore the extent and nature conflicts between citizens, groups, and/or participants in social movements exercising their constitutional rights to assemble, protest, and seek redress of grievances and how police have responded through an examination of historical and contemporary events. Outcome Students will be able to demonstrate an understanding of the causes behind historic confrontations between police and the community, the challenge facing the police as they attempt to balance the twin professional tasks of protecting the rights of protesters and assuring the peace and safety of all citizens, and how police operations and policies have changed in response to these cases. Components: Lecture

Room Requirements: General Classroom(1)

Course ID:002372 15-MAR-2006 CRMJ 309(3)

Private Security Admin

Civil Disorder&Police Response

This course provides a general introduction to the fundamental concepts, characteristics, and operational techniques of private security, its relationship to professional law enforcement, and laws that cover protective security. Students will be able to demonstrate an understanding of the history, role and function of private security and how it complements and relates to the criminal justice system.

Lecture Components:

Room Requirements: General Classroom(1)

CRMJ 310(3)

Contemporary Police Issues This course provides an in-depth examination of specific contemporary issues in policing related to

Course ID:002373

Course ID:002374

Course ID:002377

recruitment and training, education and retention, innovations in policing strategies, police policies and practices, professionalism and ethics. Outcome: Students will be able to identify and discuss the impact that current issues in policing have on police operations, effectiveness, and police-community relations. Components: Lecture

Organized Crime This course offers an introduction to the concepts of organized crime, its development in America, with particular emphasis on its growth in Illinois, and how the justice system has responded to organized crime. Outcome: Students will be able to articulate the extent and nature of organized crime, how these criminal activities relate to other forms of criminal behavior, and the effectiveness of the justice system;s response to this problem.

Components: Lecture

Room Requirements: General Classroom(1)

CRMJ 352(3) Course ID:002387 15-MAR-2006

Gang Activity & Control

The course examines the emergence of street gangs in American society with a view toward understanding their structure, characteristics, purpose and activities, and reviews and evaluates prevention and control strategies. Outcome: Students will be able to demonstrate an understanding of the causes of street gangs, the methods used to control street gangs, and the impact of street gang activity on society and the criminal justice system.

Components: Lecture(In person) Room Requirements: General Classroom(1)

Course ID:002388 15-MAR-2006

White Collar Crime

CRMJ 353(3)

This course provides an overview of corruption and criminal behavior in social institutions, particularly business and government, and examines the historical context, reasons, societal costs and implications, and response of the justice system to these crimes. Outcome: Students will be able to describe the extent and nature of white collar crime, articulate how it is different from and similar to ¿traditional¿ crimes in terms of its causes and costs, and describe how these crimes have been viewed by society and the justice system.

15-MAR-2006

Components: Lecture Room Requirements: General Classroom(1)

CRMJ 354(3) Course ID:002389 Chicago Justice: CRMJ System Cook County

This course provides a comprehensive examination of the organization and functions of the criminal and juvenile justice systems/agencies in Cook County ; the largest jurisdiction of its kind in the U.S. Outcome: Students will be able to describe the organization, functioning, and challenges facing the justice system and agencies within Cook County, and discuss how this system relates to criminal justice agencies at the state and federal level.

Components: Lecture(In person) Room Requirements: Electronic Classroom(1)

CRMJ 355(3) Course ID:002390 15-MAR-2006 Crim Just Senior Capstone Course

Prerequisites: senior standing and completion of nine CRMJ courses. This course synthesizes and integrates the knowledge gained through previous criminal justice courses and applies this knowledge in a sophisticated way to various case studies, current issues, and events so that students understand the principles, theories, and complexity of criminal justice policy and practice in the United States. Outcome: Through this course, students will be able to effectively apply all that they have learned throughout their criminal justice courses and apply them to demonstrate a sophisticated understanding of criminal justice practice and policy.

Components:LectureRequirement Group:Pre-requisite: 9 Criminal Justice courses and senior standing or above.Room Requirements:General Classroom(1)

CRMJ 360(3) Course ID:002391 15-MAR-2006

Drug Abuse Control

This course provides a comprehensive overview of the problems posed by the abuse of drugs in the United States. Outcome: Students will be able to describe the major drugs of abuse, their origins, patterns of use and abuse, how they are legally and socially viewed, and the effectiveness of efforts to control the supply and demand on drugs.

Course ID:010759 22-APR-2008

Database Programming

This course introduces relational and object databases to support database Prerequisite: COMP 271 creation and application development. Use of commercial database products will give a practical orientation. Outcome: Students will learn SQL, database design and application development using the latest software tools. Students will also learn techniques for web based data retrieval and manipulation.

Components: Lecture(In person) Course Equivalents: COMP 353 Requirement Group: Pre-requisite: Comp 271. Room Requirements: General Classroom(1)

BIOI 363(3) Course ID:010760 22-APR-2008

Desgn and Analysis Computer Algorithms

algorithms may be supplemented by small amounts of programming. Outcome: The ability to design and analysis of computer analyze efficient algorithms, understanding of the second analyze efficient algorithms; understanding of the necessary models and mathematical tools; understanding of a variety of useful data structures and fundamental algorithms; exposure to the classification of computational problems into different complexity classes.

Components: Lecture(In person) Course Equivalents: COMP 363 Requirement Group: Pre-requisites: (COMP 163 or COMP 211) & COMP 271 Room Requirements: General Classroom(1)

Course TD:010421 28-JUN-2007

BIOI 366(3) Biochemistry

An introduction to biochemical principles as they relate to major biological themes such as the relationship between cellular structure and function, metabolism, thermodynamics, regulation, information, pathways, and Outcome: Students will study the basic concepts of biochemistry and will understand how evolution. thermodynamics govern biochemical processes. Catalytic strategies, as well as the major pathways of both anabolism and catabolism, will also be learned.

Discussion, Lecture(In person) Components: Course Equivalents: BIOL 366 Room Requirements: Electronic Classroom(1)

Course ID:010761 BIOI 383(3) 22-APR-2008

Computational Biology

Prerequisite: Biol 388, Comp 163, and Comp 271. This course presents an algorithmic focus to problems in computational biology. It is built on earlier courses on algorithms and bioinformatics. Problems and solutions covered in this course include gene hunting, sequence comparison, multiple alignment, gene prediction, trees and sequences, databases, and rapid sequence analysis. Outcome: Students will learn, in detail, foundational methods and algorithms in bioinformatics.

Components: Lecture(In person) Course Equivalents: COMP 383 Room Requirements: Lab - Computer(1)

BIOI 387(3) Genomics

BIOI 388(3)

Bioinfomatics

Genomics is the compilation, characterization, and evaluation of DNA sequence information and its integration with established methods and genetic knowledge. This course will introduce the students to the study of genome structure and function and its application to biomedicine, agriculture, and evolution. Outcome: Students will acquire an in-depth knowledge of the nature of genome structure, function, and evolution as well as the methods used to obtain and evaluate this knowledge and its application to systems biology and biomedicine.

Components:Lecture(In person)Course Equivalents:BIOL 387Room Requirements:Electronic Classroom(1)

Course ID:010426 09-JUL-2007

Students will engage in the applications of computer-based tools and database searching to better understand DNA and protein structure, function, and evolution. Outcome: Students will be able to apply their understanding of genetic and evolutionary processes to the appropriate use of computer software and manipulation of large databases to accurately predict structural, informational, functional, and evolutionary characteristics of DNA and protein sequences

Components:Lecture(In person)Course Equivalents:COMP 381, BIOL 388Room Requirements:Electronic Classroom(1)

BIOI 390(4) Course ID:010427 09-JUL-2007

Prerequisites: BIOL 251, 282, 283 and CHEM 222 or 224. This course is an intensive laboratory course in the basic principles and techniques of molecular biology, including bacterial cloning, polymerase chain reaction, restriction mapping, agarose gel electrophoresis, and DNA sequencing. Outcome: Students will be able to demonstrate basic molecular biology skills including manipulation of bacterial cultures and DNA, plasmid minipreps, gel electrophoresis, cloning, polymerase chain reaction, and other molecular techniques that may be specific to their chosen independent projects. Components: Laboratory(In person)

Course Equivalents: BIOL 390 Room Requirements: Lab - Biology(1)

Molecular Biology Laboratory

BIOI 395(1 - 3) Course ID:010748

Special Topics: Bioinformatics
Special areas of bioinformatics outside the usual curriculum that vary each time the course is offered.
Outcome: Students will gain knowledge in and master a unique topic in bioinformatics.
Components: Lecture(In person)
Room Requirements: Electronic Classroom(1)

15-APR-2008

Department Consent Required

BIOI 398(1 - 4) Course ID:010745 14-APR-2008 Department Consent Required Bioinformatics Internship

An independent research experience involving laboratory experiments, computer program development, or statistical analysis or any combination of these performed off-campus under the mentorship of a Bioinformatics scientist not affiliated with Loyola. Outcome: All students will acquire skills to perform and report on independent research and to be intellectually responsible for evaluating their own and related work. Other outcomes will include at least one of the following: Experimental expertise, statistical evaluation of data sets, design and use of computational tools. Components: Independent Study(Independent Study)

BIOI 399(1 - 4) Course ID:010746 14-APR-2008 Department Consent Required

Bioinformatics Research

An independent research experience involving laboratory experiments, computer program development, or statistical analysis or any combination of these performed under the mentorship of one or more Bioinformatics faculty members. Outcome: All students will acquire skills to perform and report on independent research and to be intellectually responsible for evaluating their own and related work. Other outcomes will include at least one of the following: Experimental expertise, statistical evalulation of data sets, design and use of computational tools.

Components: Independent Study (Independent Study)

College of Arts and Sciences - English - Subject: English

ENGL 356(3) Course ID:002641 26-OCT-2007

This course is an historical survey of major trends and figures in rhetorical theory. Rhetoric will be studied as a theory of the use of language to create responses in an audience, and as a theory of discourse alongside literary theory and philosophy. Outcome: Students will become familiar with: major trends and figures in the history of rhetorical theory; areas of intersection between rhetorical theory and other kinds of discourse concerned with the nature and effect of language (and possibly other media), especially within philosophy and literary theory; selected theories concerning the social and political force of rhetoric. Components: Lecture

ENGL 359(3)

High and Low Culture

Students will study the interactions between elite and popular culture, possibly focusing on a historical period or on a conceptual issue such as the framing of ¿canons.¿ Students will review and assess the assumptions and goals of those who create and critique works of culture. Students will also analyze the criteria by which specific works are judged. Outcome: Students will be able to describe, analyze, and formulate an argument about cultural productions, using appropriate critical and technical vocabulary.

Components:LectureRequirement Group:Pre-requisite: UCWR 110 and one 200-level English course.Room Requirements:General Classroom(1)

Course ID:002645 26-OCT-2007

Studies in Culture

ENGL 360(3)

This course offers intensive study of a selected topic concerned with the material analysis of ¿culture¿ such as electronic media, popular drama and performance, colonial culture, music or film. Students will analyze key (e.g. vanguard, exemplary, and contested) cultural artifacts. Students will also examine the criteria by which specific works are praised and critiqued. Outcome: Students will receive training in the understanding, appreciation, and criticism of cultural productions. They will also be able to use the critical vocabulary necessary for understanding cultural artifacts.

College of Arts and Sciences - English as a Second Language - Subject: English as a Second Language

15-MAR-2006 53(6) Course ID:009505 ESL Intensive Language Skills Development-Advanced This course integrates the language skills of reading, writing, speaking, and listening at the advanced level. Students will examine academic texts and will produce both individual and group oral reports as well as essays and written reports. Components: Lecture (In person) ESL 55(3) Course ID:002876 24-JUN-2008 Department Consent Required Graduate Preparation I This course addresses the needs of graduate students at the Intermediate/Low Advanced level. Students will study grammatical and syntactic structures necessary for clear communication in English for academic purposes and will produce a variety of texts. Lecture(In person) Components: Room Requirements: Electronic Classroom(1) Course ID:002877 ESL 56(2) 15-MAR-2006 English for Special Purposes GS2 This is an integrated skills course for advanced level graduate students. Students will examine the stylistic requirements of English for academic purposes. They will study the language used in peer-reviewed journals in their respective disciplines and present oral reports and written assignments in appropriate academic English. Lecture(In person) Components: Room Requirements: General Classroom(1) ESL 58(4) Course ID:009506 15-MAR-2006 Language Skills for U.S. Academic Environment This course prepares students for undergraduate programs at US colleges and universities. They will examine the US academic culture and focus on discussion techniques, oral presentation and pronunciation skills, and notetaking guidelines. They will also write a variety of papers representative of college course assignments. Components: Lecture (In person) ESL 59(4) Course ID:009507 15-MAR-2006 Langauage Skills for Professionals This course assists professionals as well as graduate and pre-professional students in developing the writing and discussion skills needed in their fields. They will prepare team and individual oral and written reports, examine research methods, and assess the cultural aspects of professional communication. Components: Lecture(In person) ESL 62(3) Course ID:009601 15-MAR-2006 Listen/Speak-Intermediate/LowAdv This course focuses on vocabulary and idioms in oral communication. Students will listen to and engage in a series of informal conversations and discussions, present oral reports, and listen to lectures while developing notetaking skills. Students will focus on concrete topics and begin to examine more abstract topics. Components: Lecture (In person) Room Requirements: Video Room (TV and VCR) (1) ESL 63(3) Course ID:009604 15-MAR-2006 Reading Writing Grammar-Intermediate/LowAdv This course focuses on academic writing at the sentence level and on paragraph development, with emphasis on writing clearly and recognizing local and global errors. Students will also improve comprehension of texts about concrete topics and begin to examine more abstract topics. Components: Lecture(In person) Room Requirements: General Classroom(1) 64(3) Course ID:009602 15-MAR-2006 ESL Listen/Speak-Advanced This course focuses on oral communication and listening skills at the advanced level with a focus on vocabulary development, discussion techniques, notetaking skills, and academic lecture comprehension. Students will prepare group and individual oral reports.

College of Arts and Sciences - Environmental Studies - Subject: Environmental Studies

ESP 180(3) Course ID:009809 10-JAN-2006

This course introduces students to the fundamental concepts, principles, theories and knowledge in the area of environmental science relative to the impact that humans as consumers have on the environment and how these interactions affect the probability of establishing sustainability for human and non-human inhabitants of planet Earth. Emphasis will be placed on consumptive practices in the areas of food and agriculture, use of non-renewable energy and natural resources pertaining to transportation and housing practices, and the effluent by-products of our current lifestyles and their concomitant effects on the health and well-being of humans. The course provides students with an understanding of ecological energetics so that we may comprehend our role as consumers, the impact of consumption on ecosystems and the reciprocal effect that ecosystem change has on human health.

FNAR 116(3) Course ID:003048 15-MAR-2006 Color Slide Photography

A non-darkroom, introductory course to the equipment, techniques and aesthetics of creative photography that emphasizes camera controls, principles of composition, concepts of color theory, the unique potential of the projected image, and personal expression. An adjustable 35mm camera is required. Outcome: Students will be able to demonstrate an understanding and application of exposure, depth of field, rendering motion, full frame composition, sequential imagery, balance of film and light source, and the functions of color, all of which support the practice of creative photography.

Components: Lecture

Room Requirements: Studio - Fine Arts(1)

FNAR 118(3) Course ID:003049 15-MAR-2006

Printmaking I

An exploration of the production of fine art multiples as they are created utilizing zinc and copper plates. Techniques of etching and engraving aquatint and color printing as well as innovative processes are taught. Outcome: Students will demonstrate understanding of the techniques needed to produce images on metal plates and alternative surface; the intrinsic qualities particular to expression in print media, recognize fine prints, specific techniques, and archival quality in historical examples, use intaglio presses as a means of production and form evaluative judgments about printed imagery.

Components: Lecture

Room Requirements: Studio - Fine Arts(1)

FNAR 119(3) Course ID:003050 15-MAR-2006

Watercolor Techniques

An introduction to the basic elements of watercolor painting including: the application of drawing, design, and color principles. A variety of techniques and materials will be explored including, watercolor paints and pencils, and brush and masking techniques. Observational problems will be introduced to build technical, perceptual, and personal expressive interpretation of form through the watercolor painting idiom. Outcome: Students will be able to demonstrate an understanding of basic painting principles and vocabulary, through practice and articulation of both formal and artistic ideas.

Components: Lecture

Ceramics: Handbuilding

Room Requirements: Studio - Fine Arts(1)

FNAR 120(3) Course ID:003051 15-MAR-2006

An exploration of various handbuilding techniques, surface design techniques, and firing ranges available to the contemporary ceramist. Students are encouraged to pursue individual expression in the context of a broad range of methods and creative concepts. Outcomes: Students will be able to demonstrate the basics of successful construction and glaze techniques; demonstrate creative strategies and critical evaluation of the creative process; demonstrate an understanding of both historical and contemporary approaches to the medium and the role of the Ceramic artist in cultures past and present.

10-APR-2006 FNAR 124(3) Course ID:003053 Sculpture I An introduction to three dimensional concepts and materials, and associated techniques, in the process of articulating a personal artistic statement. Students will be guided in the fabrication of various 3-D constructions employing a wide range of building materials such as plaster, wood, clay, foam board, paper, and metals. Outcomes: Students will be able to translate two-dimensional sketches and drawings into expressive three dimensional forms; demonstrate basic sculpting techniques and creative strategies; provide critical evaluation of the creative process; and produce objects that are viewable in the round, structurally stable with masses and appendages proportionate to one another. Components: Lecture CORE Artistic Knowledge and Experience Attributes: Room Requirements: Studio - Fine Arts(1) FNAR 126(3) Course ID:003054 15-MAR-2006 Metal Sculpture and Welding This course introduces students to the manipulation of iron, steel and steel alloys. Students learn how to choose gauges of steel, cut with oxy-acetylene torch and metal cutting wheels and blades and attach steel by traditional welding techniques. Outcomes: Students will be able to operate a torch safely; cut and weld cleanly, file grind and polish, forge, hammer and shape steel sheeting; demonstrate the ability to convert two-dimensional ideas into cogent three-dimensional forms; demonstrate understanding and control over hazardous technical processes and demonstrate understanding of the evaluative criteria of metal work. Components: Lecture Room Requirements: Studio - Fine Arts(1) FNAR 129(3) Course ID:003055 15-MAR-2006 Printmaking-Monotypes An introduction into the various methods of producing one of a kind highly individual prints from a vast

array of printing surfaces. A variety of materials will be explored through assignments which encourage an understanding of technique, perceptual thinking and expression of form. Outcomes: Students will be able to demonstrate a functional knowledge of a wide variety of printing media, be able to utilize the basic tools particular to each medium and produce a consistent series of formal images through recognition of their expressive properties.

Components: Lecture Room Requirements: Studio - Fine Arts(1)

FNAR 132(3)

Visual Communication I

This course initiates a professional sequence whereby the student receives an introduction to typography and the use of two dimensional design principles necessary for visual communication. Outcome: Students will gain an understanding of the fundamental principles of visual communication. They will develop technical skills in materials and techniques and they will be able to articulate both formal and artistic ideas to others.

The Crafts of China

This course examines the artisan crafts of China historically and technically. The course explores how and why the crafts appeared, their historicakl trajectory and demonstrates how the crafts improved technically. Ceramics, Bronze Castings and Wood works will serve as prototypes. Students will undertake independent researches. Outcome: Students will identify how the crafts of woodwork, bronze casting and ceramics evolved and how they are currently practiced in China. Students will articulate an understanding of the function of craft in Chinese culture as well compare and contrast it to the function craft in their own

Course ID:009843 15-MAR-2006 FNAR 170(3) Three-Dimensional Design An examination of the basic elements and organizational systems of spatial expression through the application of design principles and theory. Outcome: Students will be able work with a variety of materials to produce three-dimensional objects in space, and understand how to control the viewer¿s reaction to those objects through the manipulation of solidity, transparency, movement and time. Lecture Components: Room Requirements: Studio - Fine Arts(1) FNAR 190(3) Course ID:003061 15-MAR-2006 Color Theory Prerequisite: majors only An examination of the nature of subtractive and additive color in its physiological, psychological, aesthetic, and symbolic dimensions through the application of past and current Outcome: Students will be able to manipulate color papers, paints and inks in a series of specific theory. exercises that explore the many aspects of color to the end of understanding how color influences human reactions to information and products. Lecture Components: Room Requirements: Studio - Fine Arts(1) FNAR 195(3) Course ID:010431 14-JUL-2007 Department Consent Required Topics in Fine Arts Pre-Collegiate This course consists of special topics in specific Fine Arts areas, and is offered for the Pre-Collegiate student. Outcome: While the specific area of study varies, the expectation is that the student wil become familiar with the methods, materials and asethetic properties of that artistic approach, as well as the technical means to control the expression. Components: Lecture Theatrical Experience, Museum Studies, Museum Practice Topics: Requirement Group: Class restricted to Pre-Collegiate Summer Scholars. FNAR 199(3) Course ID:003062 15-MAR-2006

Art and Visual Culture

Art History: Renaissance; Modern

An introduction to the principles of art and their application to broader visual culture, this course explores the complex nature of art through an examination of its visual elements, techniques, functions, critical methodologies, and related social issues. The course takes advantage of Chicago's artistic resources. Outcome: Students will demonstrate knowledge of the elements of visual language; means of visual expression in diverse cultures and eras; media and techniques of art; artistic terminology; and critical approaches to the study of visual culture and related social issues. Students will acquire the skills to interpret art and visual culture in oral and written form.

FNAR 218(3) Course ID:003074 15-MAR-2006

Printmaking II

This course explores specialized work in intaglio, monotypes, and mixed media. Prerequisite: FNAR 118 Emphasis is placed on the development and perfecting of technique. Outcome: Students demonstrate understanding of mixed-media printing; knowledge of a wide range of printmaking media; apply drawing concepts to the materials of printmaking; produce a consistent body of work in a complex medium; recognize historical prototypes and articulate the differences to others; and form judgments needed to adapt image making in a highly technical area of expression.

Components: Lecture Room Requirements: Studio - Fine Arts(1)

Course TD:009875 23-FEB-2006

Digital Photography

.Prerequisite FNAR 115 An introduction to digital photography as a medium of visual communication and personal expression. Students learn the fundamental operation of the digital camera, flatbed scanner and inkjet printer in conjunction with picture-editing software enable students to continue exploring the photographic themes and vision initiated in previous courses. Digital cameras are provided; an adjustable 35mm camera is required. Outcome: Students demonstrate understanding and application of the numerous exposure, capture, playback and output modes of current digital technology; the advantages and limitations of integrating analog and digital photography; the range of choices for physical or electronic output; and the possibilities that digital technology offers to expand the photographer; s visual expression.

Lecture(In person) Course Equivalents: IFMS 220 Room Requirements: Studio - Fine Arts(1)

FNAR 221(3)

Ceramic Science

An examination of practical and experimental approaches to applied chemistry as it relates to the ceramic arts. Students will learn the theory behind clay and glaze formulation, test a wide array of materials interactions; and learn practical skills in developing vitreous bodies, glass forming substances, and Outcomes: Students will be able to demonstrate knowledge of inorganic compounds metallic oxide pigments. and their useful combinations in formulating ceramic bodies, glazes, and pigments; demonstrate knowledge of the effects of firing temperature and atmosphere on ceramic formulations; demonstrate knowledge of safe lab practices in the ceramics studio.

College of Arts and Sciences - Fine Arts - Subject: Music

01-JUN-2007 MUSC 144(3) Course ID:005453 Music Theory I An introduction to the fundamentals of melodic construction in all the diatonic modes (major/minor and modal) and culminates in control of two-part counterpoint. Melodies will be examined and broken down into their essential components. The class strengthens the basic musicianship skills of the student through performance of the students' written compositions illustrating the class concepts. Must be taken concurrently with MUSC Outcome: Through the study of melody students will develop an understanding of musical notation, the 145. organization and color of all diatonic scales (major/minor and modal), interaction between intervals, transposition and its implications, rythmic and beat structure, and begin developing critical analysis skills. Components: Lecture (In person) Room Requirements: Music Room(1) MUSC 145(1) Course ID:010311 18-APR-2007 Musicianship Lab I This course reinforces concepts presented in Music Theory I and introduces students to the basic concepts of sight singing, ear training and dictation. The voice is the class's primary focus. This course must be taken concurrently with MUSC 144. Learning Outcomes: Recognize Music Theory I concepts by ear, dictate accurately those concepts, and recreate them on the voice and piano. Apply these concepts to student's primary instrument. Components: Lecture (In person) Room Requirements: Studio - Fine Arts(1) MUSC 153(3) Course ID:010788 03-MAY-2008 The Music of China This course surveys the broad range of Chinese musical traditions as well as the practice of fieldwork, music theory and methdological issues encountered in Chinese music studies. Outcome: Students will identify Chinese musical traditions throughout history and their connections to the Chinese language, history, cultural and religious studies and politics. Components: Lecture Requirement Group: Restricted to Beijing Students MUSC 154(3) Course ID:005454 15-MAR-2006 Intro to Opera Survey of opera from 1600 to the present and consideration of opera as an art form which combines music and drama. Analysis of libretto structure and study of the variety of operatic styles are included. Outcome: Fundamental acquaintance with a wide selection of operatic literature and the principle eras of the European and American traditions. Lecture Components: **Room Requirements:** General Classroom(1) MUSC 155(3) Course ID:005455 15-MAR-2006 Intro to Symphonic Music Survey of the principal forms of orchestral music from the Baroque to the present. Course will include: the symphony, concerto suite, overture, and symphonic poems. (Also offered at Rome Center.) Outcome: Functional knowledge of the language and grammar of music through selected analysis and experience of specific symphonic literature. Components: Lecture Room Requirements: Music Room(1) MUSC 156(3) 15-MAR-2006 Course ID:005456 Intro to Jazz Survey of the development of jazz emphasizing the major trends and artists of this unique American style. Listening skills will be developed. Outcome: Functional knowledge of the language and grammar of this uniquely American music through selected analysis and experience of specific Jazz literature. Components: Lecture Course Equivalents: BWS 156 **Room Requirements:** General Classroom(1) MUSC 157(3) Course ID:005457 15-MAR-2006 America Popular Song Survey of American popular song from the early 19th century minstrel shows to the present. The evolution of this music and its relationship to society will be studied. Listening skills will be developed. Outcome: Functional knowledge of the language and grammar of popular music through selected analysis and experience of specific repertoire.

Course Catalog

Run Date: 08/14/2013 Run Time: 15:33:55

College of Arts and Sciences - History - Subject: History

HIST 290(3) Course ID:003533 15-MAR-2006

This course explores the three cultures of the Middle Ages - Islam, Byzantium, and Europe, with particular emphasis on art, music, and literature. Outcome: students will understand how these cultures developed through shared roots, mutual influence, interaction and reaction; be able to interpret artistic expression and material culture in historical context; and gain skill in the analysis of primary sources.

Room Requirements: General Classroom(1)

HIST 291(3) Course ID:003534 15-MAR-2006

Junior Colloquium

Prerequisite: 12 hours in HIST This course studies the ways historians arrive at their interpretation of events. This is accomplished through a history of historical writing or through a special selected topic that illustrates the use of different methods by past and present historians. Students are expected to take this course after completing their four introductory courses for the major. Outcome: students will understand that history is not a set of facts but a discipline that depends on competing paradigms and the ongoing interpretation of primary sources.

Components: Seminar(In person)

HIST 292(3) Course ID:003535 15-MAR-2006

History U.S. Environment

This course surveys the environment and environmentalism in United States history, from the transformation of New England into a farm ecology, the expansion of the cotton South, the settlement of the West, to the rise of industrial cities, suburban sprawl, and the globalization of the economy. Outcome: Students will be able to demonstrate historical knowledge of environmental thought and ecological science, to draw links between environmental concerns and public policies, and to develop critical thinking and communication skills.

Components: Lecture Course Equivalents: ESP 292 Room Requirements: General Classroom(1)

HIST 293(3) Course ID:003536 15-MAR-2006

Women's Sphere in Past Society

This course examines comparative perspectives on feminism, sexuality, and women in the family and in public life in Europe 1700-present. Outcome: Students will demonstrate understanding of women's contributions to history, historian's perspectives on women in history, and the gendered definition of public and private spheres.

Components: Lecture Course Equivalents: WOST 256, WSGS 256 Room Requirements: General Classroom(1)

HIST 294(3) Course ID:003537 15-MAR-2006

Men & Women in US History

This course examines the changes in gender roles and the relationship between men and women from the colonial era to the present. Outcome: Students will demonstrate understanding of the changing expectations about and definitions of men and women of how families were organized, how childrearing was handled, who made up the home, and how work and family production followed a sexual division of labor.

Components: Lecture Course Equivalents: WOST 290, WSGS 290 Room Requirements: General Classroom(1)

HIST 295(3) Course ID:003538 15-MAR-2006 Tpc:Gender Race Class US Hist

This course examines the historical interplay of gender, race and class in the lives of African-American and white women in the United States. Outcome: Students will understand critical themes and periods in the development of racism and sexism, especially the ways in which the two relate; differences and similarities in the manifestations of and reactions to racism and sexism in the lives and thought of African-American and white women of differing class backgrounds.

Components: Lecture Course Equivalents: PAX 295, WOST 299, WSGS 299 Room Requirements: General Classroom(1) Women in East Asia

15-MAR-2006 HIST 296(3) Course ID:003539

This course studies the lives of Asian women in China, Japan, and Korea from early modern times to the present by examining changing roles of women and how these changes have come about. Outcome: Students will be able to explain how life reflects law in the political, social, economic and cultural history of Asian women; how imperialism and war have affected women; how women have effected change.

Components: Lecture Course Equivalents: ASIA 296, INTS 296, WOST 296, WSGS 296 Room Requirements: General Classroom(1)

HIST 297(3) Course ID:003540 15-MAR-2006

The Jesuits:Life and History

This course examines the history of the Society of Jesus from its founding by Ignatius Loyola in the 16th century to its activities in the contemporary world. Outcome: Students will gain a sense of the characteristics of Jesuit spirituality and the contribution of Jesuits to various fields of human endeavor such as evangelization, education, politics, literature, and the visual arts.

Components: Lecture

Room Requirements: General Classroom(1)

HIST 299(3) Course ID:003542 15-MAR-2006

Contemp Global Issues:Hist Perspective

This course will introduce students to important contemporary issues such as globalization, resurgent ethnic and religious strife, racism, imperialism, and the crisis of the nation state, among others. Both thematic and chronological approaches will be employed in examining selected world regions. Outcome: Students will be able to demonstrate an understanding of the way history shapes pressing issues in the contemporary world, the way a historical approach helps make sense of these same issues, and the value of comparative study and analysis across time and place.

Course ID:003575 15-MAR-2006 HIST 336(3) Germany in Twentieth Century This course will cover the major phases of modern German history: Wilhelmine Germany, Volkish Germany, Germany in the First World War, Weimar Germany, National Socialist Germany, Germany in the Second World War, Post-War West Germany, East Germany, and Reunification. While setting forth the background of political and social developments, we will carefully consider responses to these issues by leaders in German intellectual and cultural life. Outcome: Students will apprehend the role of Germany in World War I; the turn to the Weimar Republic; the Rise and Fall of National Socialism; the emergence of two Germanies as a consequence of defeat in World War II; reunification in 1989; and cultural responses to these developments. Components: Lecture Course Equivalents: INTS 336 Room Requirements: General Classroom(1) HIST 337(3) Course ID:003576 15-MAR-2006 The Nazi Revolution The course will deal with the causes, main features and consequences of the Nazi movement in Germany and Europe from 1919 to 1945. Outcome: The students explore the origins of Nazism and the reasons for Hitler; success. Students appreciate the elements of ;Nazi culture,; the nature of Nazi rule in the 1930s, Nazi foreign policy and aggression in the 1930s, and World War II. They acquire a sense of the Nazi movement as a phenomenon growing out of unique German circumstances as well as one reflecting the larger context of modern western history. Components: Lecture Room Requirements: General Classroom(1) HIST 338(3) Course ID:003577 15-MAR-2006 Modern France This course explores the cultural and political development of modern France as a nation and an imperial power. Outcome: Students gain familiarity with the formation of national identities; the discourse and practice of French nationalism and republicanism; and the forms of resistance and collaboration that shaped relations between citizens and the state, colonized peoples and the empire. Components: Lecture Course Equivalents: INTS 338 Room Requirements: General Classroom(1) HIST 340(3) Course ID:003579 15-MAR-2006 Russia pre-1917: Empire Building This course examines how, by the middle of the 19th century, Russia emerged as the largest empire in the world. Outcome: Students will be able to explain how Russia survived the ravages of the Mongols under Chingis Khan, the reign of terror under Ivan the Terrible, westernization under Peter the Great; opened itself to new ideas under Catherine the Great, while it continued to preserve an oppressive institution of serfdom and remained a deeply divided society ready to explode in 1917. Components: Lecture Room Requirements: General Classroom(1) Course ID:003580 15-MAR-2006 HIST 341(3) Rise & Fall of Soviet Union This course will cover such issues as the Revolution and Civil War, Stalings repression, victories in World War II, the years of stagnation, Soviet society, its institutions and culture. Outcome: Students will be able to explain how the Russian Socialist revolution came into being, what kind of society it sought to create, and how this new society, the Soviet Union, developed and finally dissolved in 1991. Components: Lecture Course Equivalents: INTS 392 Room Requirements: General Classroom(1) HIST 342(3) Course ID:010372 04-JUN-2007

Traditional China from Antiquity to 1550

This course wil trace Chinese history from the origins of classical Chinese civilization in the Shang and Zhou periods to the evolution of an agrarian society under the imperial state. Outcome: Students will gain an understanding of how domination by aristocratic lineage gave way to the Confucian state and society based on peasant farming; and how a bureaucratic and autocratic polity existed in symbiosis with a socioeconomic elite that maintained itself through the dominance of the agrarian economy as well as through increasing access to the sources of commerce and trade.

World War I and American Culture

Although World War I's impact on America paled in comparison to that of the European combatants, the wartime experiences affected the nation's economic, political, and cultural life for the remainder of the twentieth century. This course examines America's World War I experience and explores its legacy. Outcome: Students will understand how the United States underwent the transformation from a relatively minor player on the international scene to an international presence, how those living through these years experienced social, cultural, economic, and political challenges associated with American life in the twentieth century; and how the roads taken and not taken during this period have shaped the options available to us today. Lecture(In person)

Components:

Room Requirements: General Classroom(1)

HIST 367(3)

This course focuses on American history from 1940 to the present, a period of international engagement and domestic reform. Outcome: Students will be able to demonstrate historical knowledge of the politics and government of the United States during a period of Cold War, struggles for equality and diversity, and the Vietnam War, and to develop critical thinking and communication skills.

Run Date: 08/14/2013 Run Time: 15:33:55

College of Arts and Sciences - Intl Film & Media Studies - Subject: Intl Film and Media Studies

IFMS 302(3) Course ID:010702 27-FEB-2008

This course will give an overview of major films produced in mainland China since 1949. Students will examine the genres of Chinese film better known in contemporary China and consider them a major source of reflection upon, and critique of, contemporary Chinese society and culture. Outcome: All films chosen for the course will hel inform students' understanding of modern China in terms of its material conditions and ideology. Components: Lecture

Course Equivalents: CMUN 301, ASIA 302, INTS 302A Requirement Group: Restricted to Beijing Students

IFMS 308(3) Course ID:010384 01-JAN-1901 Media and Cultural Change

The course considers the transformative effects of communications technology on the social and cultural aspects of human life. Outcome: Students will understand how anthropological ethnography can actually be set into the context of our contemporary electronic culture.

Components: Lecture(In person) Course Equivalents: ICVM 308, ANTH 308

Room Requirements: General Classroom(1)

Course ID:010301 13-APR-2007

Course ID:010385

Prerequisite: ICVM 201 or 222 This course offers an in-depth analysis of film genres, their conventions, and /or cultural functions (e.g. documentary film noir, science fiction). Selected film viewing is a catalyst for analyzing the relations between ideology, authorship, and storytelling. May be repeated with different topic for a total of 9 hours but only 6 may count towards the major. Outcome: Students will be able to demonstrate knowledge what constitutes a genre and the varied approaches used to analyze films within the context of genre studies.

Components:	Lecture			
Topics:	Horror/Science	Fiction,	Film Noir,	Documentary
Course Equivalents:	ICVM 323, CMUN	323		

IFMS 324(3) Film Genre

IFMS 323(3)

Film Genre

An in-depth analysis of film types, their conventions, and/or cultural functions (e.g., documentary, film noir, science fiction, thriller, and western). Selected film viewing is the catalyst for analyzing the relations between ideology, authorship, and storytelling. May be repeated (with different topics) for a total of 9 hours but only 6 may count toward the major.

Course ID:010388 26-OCT-2004 IFMS 339(3) Video Documentary Prerequisites: Either CMUN 201 or 222, and 232 or 235, and permission of instructor This course offers hands on production of video documentaries through the study of electronic field production technology, the analysis of documentary texts, and the application of documentary research methods. Outcome: Students will gains hands-on video production experience in a non-narrative genre. Lecture(In person) Components: Course Equivalents: ICVM 339, CMUN 339 **Room Requirements:** General Classroom(1) IFMS 360(3) Course ID:010389 23-NOV-2007 Advanced Topics in Media and Society This course explores various topics related to the relationship between media and society at the advanced level. A specific topic related to media and society will be selected each time the course is offered. The course may be repeated three times for credit. Outcome: The student will gain a theoretical and historical perspective on the specific topic of the course as it relates to media and society. Lecture(In person) Components: Topics: Cinematography, Topics in the Study of Culture, Sociable Media, Digital Ethnography Course Equivalents: ICVM 360 Room Requirements: General Classroom(1) Course ID:010555 23-NOV-2007 IFMS 361(3) Advanced Topics in Theory and Genre This course explores the theories, genre or movements associated with a various forms of film at the advanced level. A specific film genre, theory or movement will be selected each time the course is offered. The course may be repeated three times for credit. Outcome: The student will gain a theoretical perspective on a film genre as well as demonstrate knowledge of the theories and history associated with that genre. **Components:** Lecture (In person) Room Requirements: General Classroom(1) IFMS 362(3) Course ID:010556 23-NOV-2007 Advanced Topics in International Cinema History This course explores the history of various types of international film at the advanced level. A specific topic in film history will be selected each time the course is offered. The course may be repeated three times for credit. Outcome: The student will gain a historical perspective on a type of international film as well as demonstrate knowledge of important historical movements, theories and cultural influences associated with the type of film studied. Components: Lecture (In person) Topics: Soviet History through Film, Turkey: Film, Culture, & Society, Chinese History Through Film **Room Requirements:** General Classroom(1) IFMS 363(3) Course ID:010502 15-NOV-2007 Advanced Topics in Production This course explores an aspect of cinema or new media production at an advanced level. A specific topic related to the production of film, video or new media will be selected each time the course is offered. The course may be repeated three times for credit. Outcome: The student will learn the theory and or technological skills involved in the production topic area of study and will implement those skills. Lecture (In person) Components: Topics: Video and Performance, Animation, Editing & Post Production, Video Journalism, Directing for the Screen, Experimental Media Production, Public Affairs TV Production, Television Studio Production, Advanced Post Production Room Requirements: Studio - Communications(1) IFMS 365(3) Course ID:010390 04-NOV-2005

History of Photography

A chronological and thematic survey of the history of photography, especially in Europe and America. Fine art and utilitarian applications of the medium are considered by examining photographers who represent the origin and development of major pictorial forms; the interaction between technology and imagery; and the relationships between photography and historical, social and cultural events. Outcome: Students will be able to demonstrate understanding of the most important pictorial forms, themes, practitioners, processes and context of photography as a fine and applied art from the beginning of the nineteenth century to the present.

College of Arts and Sciences - International Studies - Subject: International Studies

Course ID:010701 27-FEB-2008 INTS 302A(3)

This course will give an overview of major films produced in mainland China since 1949. Students will examine the genres of Chinese film better known in contemporary China and consider them a major source of reflection upon, and critique of, contemporary Chinese society and culture. Outcome: All films chosen for the course will hel inform students' understanding of modern China in terms of its material conditions and ideology. Lecture Components:

Course Equivalents: CMUN 301, ASIA 302, IFMS 302

Requirement Group: Restricted to Beijing Students

INTS 303(3) Course ID:010265 03-MAR-2007

Violence and Culture

This course examines the comples relationships between violence and culture using the ethnographic method as practiced by anthropologists and other social scientists. Outcome: Students will demonstrate an understanding of the ways violence destroys, alters or produces forms of cultural meaning and social action and the ways in which cultural difference impacts patterns of violence.

Components: Lecture Course Equivalents: ANTH 305

Discovering China Through Film

INTS 304(3) Course ID:010368 22-MAY-2007 Women, Gender and Embodiment in Islam

This course will consider gender both as articulated in normative Islamic religious and legal systems and as embodied during various historical periods in a range of Muslim societies. Students will read a number of the most important academic studies in this field and consider anthropological and cultural materials including films and short stories that disclose Muslim practices and concepts of maleness, femaleness, and gender relations.

Lecture (In person) Components: Course Equivalents: ASIA 365, WOST 365, THEO 365, WSGS 365 Room Requirements: General Classroom(1)

INTS 305(3) International Strategy

This course analyzes how managers utilize traditional business functions Prerequisite: Junior Standing. such as finance, operations, human resources and marketing to develop global visions and strategies and to adapt these functions to international conditions and worldwide economic, political and market trends. Outcomes: Students will gain an appreciation of the differences and complexities of operating a business on a global scale and will build the strategic and organizational skills necessary for introducing a product or service into a foreign country.

06-DEC-2007

Course ID:003921

Components: Lecture Course Equivalents: MGMT 305

TNTS 305A(3) Course TD:010446 31-JUL-2007 Modern Europe and the Arts

This course takes advantage of Chicago's access to one of the most important collections of modern European art in the world. The Art Institute of Chicago offers masterpieces representing every major aesthetic movement in Western history. Full appreciation of these treasures involves recognizing the historical circumstances that surrounded their creation and considering the ideas their creators intended to communicate. Outcome: Students will better appreciate the great works themselves and learn from them about major developments in modern European social, political, and cultural history.

Components: Lecture(In person) Course Equivalents: HIST 305 Room Requirements: General Classroom(1)

INTS 306(3) Course ID:003922 01-JAN-1901 International Business International Business. (MGMT 340) (MARK 340) (FINC 340) Components: Lecture Course Equivalents: FINC 340 Room Requirements: General Classroom(1)

Urdu Script
A course in the script for Urdu, the national language of Pakistan and much of Muslim India.
Components: Lecture(In person)
Course Equivalents: HNDI 100, ASIA 100U
Room Requirements: General Classroom(1)

Course TD:010775

IWS 101A(3)

Arabic I This course is designed for students who have had little or no previous knowledge or experience of Standard Arabic. It first introduces students to the alphabet, then proceeds to teach basic grammar and vocabulary. Outcome: Students will be able to write simple sentences, understand selected principles of basic grammar and vocabulary, and will be introduced to Modern Standard Arabic as well as to a modern spoken dialect. Students will learn aspects of Arab culture.

Components: Lecture Course Equivalents: ARAB 101 Room Requirements: General Classroom(1)

Course ID:010783 02-MAY-2008

IWS 101U(3) Hindi-Urdu I

This course is an introduction to the two sister languages, Hindi and Urdu. No previous knowledge of either language is assumed. It also introduces the Devanagari script in which Hindi is written. Outcome: Students will be introduced to the spoken language and the script in which majority of the native speakers write the language.

Components:Lecture(In person)Course Equivalents:ASIA HU1, HNDI 101Room Requirements:General Classroom(1)

IWS 102A(3) Arabic II

Course ID:010776 01-MAY-2008

Prerequisite: ARAB 101 or equivalent This course continues ARAB 101. Students continue to develop basic communicative skills, both in standard modern written form and as a spoken dialect. Students will deepen their knowledge of contemporary Arab culture. Outcome: Students will be able to read elementary passages in Arabic and answer brief questions.

Components: Lecture Course Equivalents: ARAB 102 Room Requirements: General Classroom(1)

IWS 102U(3) Hindi-Urdu II

Course ID:010784 02-MAY-2008

This course is for students who have a basic knowledge of either spoken Hindi or Urdu, but do not read or write in Hindi. The course emphasizes the ability to read and write the script and the acquisition of basic grammatical structures and vocabulary. Outcome: Students will be able to develop basic proficiency in the language and will be able to speak, read and write in simple sentences at the elementary level.

Components:Lecture(In person)Course Equivalents:ASIA HU2, HNDI 102Room Requirements:General Classroom(1)

IWS 103A(3) Course ID:010777 01-MAY-2008

Arabic III

Prerequisite: ARAB 102 or equivalent. This course is a continuation of ARAB 102. Outcome: Students will be able to work with varied and complex topics, language structures to written and oral texts of Modern Standard Arabic.

Course Catalog

Run Date: 08/14/2013 Run Time: 15:33:55

Freshman Mathematics/Statistics Seminar (1-3 Credit Hours): A freshman seminar with no prerequisites on topics in the mathematical sciences drawn from algebra, geometry, statistics, and their applications. Components: Lecture(In person) Calculus w/Integrated Precalc, DVDs, Codes, and Saturn, Freshman Problem Seminar, Musi, and Mathematics, Theory of Equations, Precalc w/Integrated Calculus II, Geometry for Middle Schl Teachers, Prob & Stat for Teachers, Hist of Math for Math Teachers, Number Thry for Mid-Schl Tchrs, Computer Algebra Systems, Rubric, Review for Physical Chemistry, Logic & Prob Sulv for Teachers, Integrated Math/Sci for Tchrs, AcceleratedPrecalculusCalculus, Algebra/ MiddleGradeTeachers, Calculus/MiddleGrade Teachers Room Requirements: General Classroom(1) MATH 131(3) Course ID:005010 15-MAR-2006 Elements of Calculus I Prerequisite: MATH 118 This course provides an introduction to differential and integral calculus at the intuitive level and is intended primarily for students in the life and social sciences, computer science, and business Outcome: Students will obtain the background needed to enroll in Elements of Calculus II and the basics of integral calculus either within their own disciplines or in certain other mathematics and statistics courses. This course satisfies the quantitative literacy requirement of th core curriculum. Components: Lecture Requirement Group: Pre-requisite: Math Diagnostic Test or MATH 118. Room Requirements: General Classroom(1) MATH 132(3) Course ID:005012 15-MAR-2006 Elements of Calculus II Pre-requisite: Math Diagnostic Test or MATH 118. Room Requirements: General Classroom(1) MATH 132(3) Course ID:005012 15-MAR-2006 Elements of Calculus II Pre-requisite: Math Diagnostic Test or MATH 118. Room Requirements: General Classroom(1) MATH 132(3) C	MATH 123(1 - 3) Topics	Co	ourse ID:009884	18-MAR-2006
Components: Lecture (In person) Topics: Calculus V/Integrated Precalc, DVDs, Codes, and Saturn, Preshman Problem Seminar, Musia and Mathemalics, Theory of Equations, Precale v/Integrated Calculus II, Geometry for Middle Schl Teachers, Hors & Staf for Teachers, Hundrid Schl Teachers, Number Thry for Middle Schl Teachers, Number AcceleratedPrecalculusCalculus, Algebra Systems, Rubric, Review for Physical Chemistry, Logit & Prob Sit Vor Teachers, Integrated Mach/Sci for Torrs, AcceleratedPrecalculusCalculus, Algebra / MiddleGradeTeachers, Calculus/MiddleGrade Teachers Room Requirements: General Classroom(1) MATH 113(3) Course ID:005010 15-MAR-2006 Elements of Calculus I Prerequisite: MATH 118 This courses provides an introduction to differential and integral calculus at the nuturity levential and the basics of integral calculus either within their own disciplines or in certain other mathematics and statistics courses. This course satisfies the quantitative literacy requirement of th core curriculum. Components: Lecture Requirement Group: Pre-requisite: Math Diagnostic Test or MATH 118. Room Requirements: General Classroom(1) MATH 113(3) Course ID:005012 15-MAR-2006 Elements of Calculus II Prerequisite: MATH 111 This course is a continuation of Mathematics 111 and covers additional topics in integral calculus within their own disciplines or in certail courses. Components: Lecture Requirement Group: Pre-requisite: MATH 110 or MATH 161. Room Requirements: General Classroom(1) MATH 147(3) Course ID:005019 01-AUG-2005 Mathematics For Teachers I For course description, see CIBP 104, page XX. Components: Lecture General Classroom(1) MATH 145(3) Course ID:00502 01-JAN-1901 MATH 145(3) Course ID:00502 01-JAN-	Freshman Mathematics/			
Topics: Calculus winterparted Precale, DUB, Codes, and Saturn, Freehman Problem Seninar, Musi and Mathematics, Theory of Kuuztions, Precale winterparted Calculus II, Geometry for Middle Schl Teachers, Prob & Stat for Teachers, Hist of Math Feachers, Number Thry for Mid-Schl Tchrs, Computer Algebra/ MiddleGradeTeachers, Calculus/MiddleGrade Teachers Room Requirements: General Classroom(1) TATH 131(3) Course ID:005010 15-MAR-2006 Lements of Calculus I Terrequisites MITH 118 This course provides an introduction to differential and integral calculus at the nutritys level and is intended primarily for students in the life and social sciences, computer science, an usiness Outcome: Students will obtain the background needed to enroll in Elements of Calculus I Terrequisites MITH 118 This course provides an introduction to differential and integral calculus at the nutritys level and is intended primarily for students will be the within their own disciplines or in certain there mathematics and statistics courses. This course satisfies the quantitative literacy requirement of the ore ourrights. Math 118 This course is a continuation of Mathematics 131 and covers additional topics in integral calculus at their applications, along with an introduction to differential equations and infinit free quarters. Income: Students will objain the background needed to use more applicational topics in integral calculus at their applications, along with an introduction to differential equations and infinit free differential and the satistics course is a continuation of Mathematics 131 and covers additional topics in integral calculus within their own disciplines or in other mathematics and statistics Components: Lecture Requirements: General Classroom(1) The Course description, see CIEP 104, page XX. Components: Lecture Course description, see CIEP 105, page XX. Components: Lecture Course description, see CIEP 105, page XX. Components: Lecture Course Squivalents: Ciepring Classroom(1) That 145(3) Course ID:005020 01-JAN-1901 Tathematics				geometry, statistics, and their applications.
and Mathematics, Theory of Equations, Precale w/Integrated Calculus II, Geometry for Middle Schi Techeres, Prob Stat for Teachers, Hute of Math Teachers, Number Thry for Mid-Schi Tchra, Computer Algebra Systems, Rubric, Review for Physical Chemistry, Logic & Prob Silv for Teachers, Integrated Math/Sci for Chris, AcceleratedPrecalculusCalculus, Algebra/ MiddleGradeTeachers, Calculus/MiddleGrade Teachers Room Requirements: General Classroom(1) ARH 131(3) Course ID:005010 15-MAR-2006 Imments of Calculus I terrequisites: MATH 118 This course provides an introduction to differential and integral calculus at the nucluive level and is intended primarily for students in the life and social sciences, computer science, an use integra of the basics of integral calculus either within their own disciplines or in certain there mathematics and statistics courses. This course satisfies the quantitative literacy requirement of th ore curriculum. Components: Lecture Requirements: General Classroom(1) ARH 132(3) Course ID:005012 15-MAR-2006 Imments of Calculus II terrequisites. MATH 131 This course is a continuation of Mathematics 131 and covers additional topics in nitegral calculus within the background needed to use more cophisticated topics from ifferential and integral calculus within the background needed to use more cophisticated topics from inferences. Components: Lecture Requirements: General Classroom(1) ARH 147(3) Course ID:005019 01-AUG-2005 Attributes: COEK Values - Civic Engagement Recon Requirements: General Classroom(1) ARH 147(3) Course Engliste: MATH 131 Or MATH 161. Room Requirements: General Classroom(1) ARH 149(3) Course Engliste: MATH 131 Or MATH 161. Room Requirements: General Classroom(1) ARH 149(3) Course Engliste: MATH 131 Or MATH 161. Rooments: Lecture Course Requirements: General Classroom(1) ARH 149(3) Course Engliste: MATH 151 Or MATH 161. Rooments: Lecture Course Requirements: General Classroom(1) ARH 149(3) Course Engliste: MATH 150, page XX. Components				
Middle Schi Teachers, Prob & Stat for Teachers, Hist of Math Teachers, Number Thry for Mid-Schi Techer, Computer Algebra, Rubric, Review for Physical Chemistry, Logic & Frob Slv for Teachers, Integrated Math/Sci for Tohrs, AcceleratedPrecalculusCalculus, Algebra/ MiddleGradeTeachers, Calculus/MiddleGrade Teachers Room Requirements: General Classroom(1) THM 133(3) Course ID:005010 15-MAR-2006 Hemonts of Calculus I Teachers WHT H18 This course provides an introduction to differential and integral calculus at the restrictive is: MMTH H18 This course provides an introduction to differential and integral calculus at the restrictive is: MMTH H18 This course provides an introduction to differential and integral calculus at the restrictive is: MMTH H18 This course active is the life and social socials, computer solence, and outcome: Students will obtain the background needed to enroll in Riements of Calculus II and oute differential and the basics of integral calculus either within their own disciplines or in certain ther anthematics and statistics courses. This course satisfies the quantitative literacy requirement of th components: Lecture Requirement Group: Pre-requisite: Math Diagnostic Test or MATH 118. Room Requirements: General Classroom(1) MATH 132(3) Course ID:005012 15-MAR-2006 Hements of Calculus II Terrequisite: MATH H31 This course is a continuation of Mathematics 131 and covers additional topics in ntegral calculus within their own disciplines or in other mathematics and statistics Outcome: Students will obtain the background needed to use more sophisticated topics from therein the requirements: General Classroom(1) MATH 147(3) Course ID:005019 01-AUG-2005 Tathematics For Teachers I For course description, see CINF 104, page XX. Components: Lecture Room Requirements: General Classroom(1) MATH 148(3) Course ID:005020 01-JAN-1901 Tathematics For Teachers II For mercefulers and Rescription, see CINF 105, page XX. Course Mercuintes: General Classroom(1) MATH 149(3) Course	Topics:			
They for Nid-Schl Tchrs, Computer Algebra Systems, Rubric, Review for Physical Chemistry, Logic 5 Prob 51 for Teachers, Integrated Math/Sci for Tchrs, AcceleratedPrecalculusCalculus, Algebra/ MiddleGradeTeachers, Calculus/MiddleGrade Teachers Room Requirements: General Classroom(1) TATH 131(3) Course ID:005010 15-MAR-2006 Haments of Calculus I forerequisite: NMTH I18 This course provides an introduction to differential and integral calculus at the ntuitive level and is intended primarily for students in the life and social sociances, computer science, an usiness Cuccome: Students will obtain the background needed to enrol in Elements of Calculus II and to use differential and the basics of integral calculus either within their own disciplines or in certain ther mathematics and statistics courses. This course satisfies the quantitative literacy requirement of the Gragonents: Lecture Requirement: Group: Pre-requisite: Math Diagnostic Test or MATH 118. Room Requirements: Of Calculus II There of Calculus II There and Integral calculus within their own disciplines or in other mathematics and statistics Sources. Components: Lecture Requirements: General Classroom(1) ATH 132(3) Course ID:005012 15-MAR-2006 Chements: MATH 313 This course is a continuation of Mathematics 131 and covers additional topics in Integral calculus and their applications, along with an introduction to differential equations and infinit Erfers. Outcome: Students will obtain the background needed to use more sophisticated topics from Math 147(3) Course ID:005019 01-AUG-2005 Tathematics For Teachers II Course Equivalents: CERP 104, page XX. Components: Lecture Course Equivalents: CERP 105, page XX. Components: Lecture Course Equivalents: Centre Toto Nor Requirements: General Classroom(1) TATH 149(3) Course ID:005021 01-JAN-1901 Tather

College of Arts and Sciences - Mathematical Sciences - Subject: Mathematical Sciences

MATH 309(3) Course ID:005041 15-MAR-2006

Numerical Methods

Prerequisite: MATH 212 and 264; COMP 170 This course offers an introduction to topics such as error analysis, interpolation and approximation, and the numerical solution of problems involving differentiation, integration, and ordinary and partial differential equations. Outcome: Students will obtain an understanding of how numerical methods can be used in a variety of areas of mathematics. Components: Lecture

components:

Course Equivalents: COMP 309

Room Requirements: General Classroom(1)

MATH 313(3) Course ID:005042 15-MAR-2006

Abstract Algebra

Prerequisite: MATH 201 and 212 This course provides a rigorous introduction to the study of structures such as groups, rings, and fields; emphasis is on the theory of groups with topics such as subgroups, cyclic groups, Abelian groups, permutation groups, homomorphisms, cosets, and factor groups. Outcome: Students will obtain an understanding of abstract structures that will prepare them for advanced work in mathematics. Components: Discussion, Lecture

Room Requirements: General Classroom(1)

MATH 314(3) Course ID:005044 15-MAR-2006

Adv Topics Abstract Algebra

Prerequisite: MATH 313 This course studies advanced algebraic systems such as commutative and non-commutative rings, integral domains, fields, and additional selected topics. Outcome: Students will obtain an understanding of advanced abstract structures that will prepare them for graduate level work in mathematics.

Components: Lecture Room Requirements: General Classroom(1)

MATH 315(3) Course ID:005045 15-MAR-2006

Advanced Topics in Linear Algebra

Prerequisite: MATH 313 This course offers a rigorous abstract approach to vector spaces and transformations, including similarity, duality, canonical forms, inner products, bilinear forms, Hermitian and unitary spaces, and other selected topics. Outcome: Students will obtain an understanding of advanced linear algebra structures that will prepare them for graduate level work in mathematics.

Components: Lecture

Room Requirements: General Classroom(1)

MATH 318(3) Course ID:005047 15-MAR-2006

Course ID:005048

Combinatorics

Prerequisite: MATH 162 This course offers a rigorous introduction to combinatorics, including topics such as induction, the pigeon-hole principle, permutations, combinations, recurrence relations, generating functions, the inclusion-exclusion principle, and other selected topics. Outcome: Students will obtain an understanding of the basic topics in combinatorics that will prepare them for advanced study of related topics in mathematics and computer science.

Components: Lecture

Room Requirements: General Classroom(1)

MATH 320(3)

Mathematical Logic

Prerequisite: MATH 313 This course in modern mathematical logic begins with a study of propositional logic and leads to the study of first-order predicate logic, including quantifiers, models, syntax, semantics, the completeness and compactness theorems, and other selected topics. Outcome: Students will develop a fuller understanding of mathematical logic and therefore of the underlying theory behind proofs of mathematical assertions.

15-MAR-2006

Components: Lecture

Room Requirements: General Classroom(1)

MATH 328(3) Course ID:010322 01-MAY-2007

Algebraic Coding Theory

Codes with algebraic structure for error control are examined. Block codes including Hamming codes and Reed-Muller codes, BCH codes, and other cyclic codes and their implementation are treated. Other topics may include: convolutional codes, effciency considerations, and Shannon's fundamental theorem of information theory.

08-MAY-2007

Cryptography Prerequisite: COMP 363 or MATH 313 or 322. This course introduces the formal foundations of cryptography and also investigates some well-known standards and protocols, including private and public key cryptosystems, hashing, digital signatures, RSA, DSS, PGP, and related topics. Outcome: Students will gain an understanding of cryptosystems widely used to protect data security on the internet, and be able to apply the ideas in new situations as needed. Components: Lecture(In person) Course Equivalents: COMP 331 Room Requirements: General Classroom(1) MATH 344(3) Course ID:005051 15-MAR-2006 Geometry Prerequisite: MATH 212 This course discusses axiomatic systems which define geometries and includes topics from synthetic and analytic projective geometry. Outcome: Students will obtain an understanding of the many different geometries that are studied by teachers and researchers. Components: Lecture Room Requirements: General Classroom(1) MATH 351(3) Course ID:005053 15-MAR-2006 Introduction to Real Analysis I Prerequisite: MATH 201 and 212 This course provides a rigorous treatment of the real numbers and real-valued functions of a real variable, including sequences, the Bolzano-Weierstrass and Heine-Borel theorems, topology, uniform continuity, fixed-point theorems, derivatives, and other selected topics. Outcome: Students will obtain an understanding of the fundamentals of real analysis that will prepare them for advanced work in mathematics. Discussion, Lecture Components: Room Requirements: General Classroom(1) MATH 352(3) Course ID:005055 15-MAR-2006 Introduction to Real Analysis II Prerequisite: MATH 351 This course, a continuation of Mathematics 351, provides the theoretical background for differentiability and integrability on R and Rn and Taylor's theorem, the change of variable theorem, the inverse and implicit function theorems, Lebesgue integration, and other selected topics. Outcome: Students will obtain an understanding of topics in advanced analysis that will prepare them for graduate level work in mathematics. Components: Lecture Room Requirements: General Classroom(1) MATH 353(3) Course ID:005057 15-MAR-2006 Introductory Complex Analysis Prerequisite: MATH 264 and 351 This course provides an introduction to the theory of functions of a complex variable, including analytic functions, contour integrals, the Cauchy integral formula, harmonic functions, Laurent series, residues and poles, conformal mapping, and other selected topics. Outcome: Students will obtain an understanding of the fundamentals of complex analysis that will prepare them for advanced work in mathematics. Components: Lecture Room Requirements: General Classroom(1) MATH 355(3) Course ID:005058 15-MAR-2006 Methods of Applied Mathematics Prerequisite: MATH 264 Vector calculus, linear transformations, matrices, series solutions of differential equations, special functions; Fourier series, Fourier and Laplace transforms; Partial differential equations and topics from complex analysis, Green's functions, integral equations, the calculus

of variations. Outcome: Facility with mathematical methods used in sciences and engineering.

Components: Lecture Course Equivalents: PHYS 301, PHYS 271

 HNDI 100(1 - 3)
 Course ID:010751
 15-APR-2008

 Urdu Script
 A course in the script for Urdu, the national language of Pakistan and much of Muslim India.

 Components:
 Lecture(In person)

 Course Equivalents: ASIA 100U, IWS 100U
 Room Requirements: General Classroom(1)

 HNDI 101(3)
 Course ID:003791
 15-MAR-2006

This course is an introduction to the two sister languages, Hindi and Urdu. No previous knowledge of either language is assumed. It also introduces the Devanagari script in which Hindi is written. Outcome: Students will be introduced to the spoken language and the script in which majority of the native speakers write the language.

Components: Lecture (In person) Course Equivalents: ASIA HU1, IWS 101U Room Requirements: General Classroom(1)

HNDI 102(3) Course ID:003792

This course is for students who have a basic knowledge of either spoken Hindi or Urdu, but do not read or write in Hindi. The course emphasizes the ability to read and write the script and the acquisition of basic grammatical structures and vocabulary. Outcome: Students will be able to develop basic proficiency in the language and will be able to speak, read and write in simple sentences at the elementary level.

15-MAR-2006

History of Hispanic Feminism

SPAN 362(3)

Borges

Hispanic Women Writers

This course challenges the usual view of feminism in Hispanic societies - that it played a minimal role in the revolutionary movements of the 20th century - through the reading of a series of works from the colonial period to the present, that chart the Hispanic woman's struggle to achieve liberation and self-realization. Outcome: Students will be able to trace the true history of Hispanic feminism, beginning with Sor Juanna Ines de la Cruz, and ending with such contemporary feminist writers as Rosario Ferre, Rosario Castellanos, Montserrat Roig, and Rosa Montero.

Components: Lecture (In person) Room Requirements: General Classroom(1)

SPAN 363(3) Course ID:010202 02-DEC-2006

This course focuses on the poetry and prose of Jorge Luis Borges, one of the central figures in 20th century Latin American literature, and one of the major writers of modern times. Outcome: Students will be able to recognize the major themes and forms of Borges, as well as appreciate his seminal role in the creation of the so-called literature of the "boom" in Latin America.

Course ID:005410 01-JAN-1901 MSTU 324(3) Pre-Industrial City in Europe The Preindustrial City in Europe. (HIST 303) Lecture Components: Course Equivalents: HIST 303 MSTU 326(3) Course ID:010435 14-JUL-2007 The Vikings The Vikings are popularly thought of as invaders, maurauders, destroyers of civilized peace. However, recent research has focused on their society, culture, accomplishments and contributions in a much more positive sense. Outcome: Students will gain an understanding of the impact of the Vikings on mainstream European development (and vice versa); a knowledge of recent historiographical issues concerning the Vikings; and an awareness of the various types of primary sources (written and material) for this period. Components: Lecture(In person) Course Equivalents: HIST 334 **Room Requirements:** General Classroom(1) MSTU 328(3) Course ID:005411 01-JAN-1901 Formation Medieval Eur 300-1100 Formation of Medieval Europe: 300-1100. (HIST 310) Components: Lecture Course Equivalents: HIST 310 MSTU 330(3) Course ID:010436 14-JUL-2007 Shipwreck Archaeology Students study how the technology of scuba diving combined with scientific archaeology has created a new discipline of shipwreck archaeology since the 1960s. They follow the history of the discipline and explore shipwrecks from Bronze Age Greece to nineteenth-century Chicago. Outcome: Students understand the iportance of vessels conserved at Skuldelev, Lake Nemi and Uluburun for tracing the development of commerce and technology among the Vikings, the Romans, and the Syro-Palestinians of the Levant. They synthesize the research and conclusions of nautical archaeologists worldwide and organize those findings for presentation to a broader public in the coherent and imaginative form of their own Museum. NTSC 103(3) Life and Inquiry	Course ID:005495	15-MAR-2006
An interdisciplinary exploratio methodologies and reasoning ski will demonstrate an understandi structure, characteristics of m human physiological systems. Components: Lecture	lls used to develop this f ng of the concepts central atter and energy, cell str ntific Literacy	and characteristics of life, as well as the fundamental body of knowledge. Outcome: Students to the life sciences including atomic/molecular functure and function, biochemical energetics and
NTSC 104(3)	Course ID:005496	15-MAR-2006
discoveries that form the under in critical reasoning and metho mutations, cell reproduction, a of, evolution. Components: Lecture Course Equivalents: ESP 108	pinnings of evolutionary t ds of inquiry, and demonst nd biogeography and use th ntific Literacy	life while focusing on the major scientific theory. Outcome: Students will develop skill trate understanding of genetics, gene expression, his knowledge to assess evidence for, and mechanisms
NTSC 105(3)	Course ID:005497	15-MAR-2006
and musical scales, light and c will demonstrate an understandi this science can be applied. Components: Lecture	olor science, black holes ng of the methods of physi ntific Literacy	including the laws of motion, orbital motion, sound and the laws of relativity. Outcome: Students cal science, the critical reasoning involved and how
NTSC 106(3) Concepts in Phy Sci:Matter	Course ID:005498	01-JAN-2008
The concept of matter is traced principle, with an emphasis on skilled in critical reasoning a physics concepts related to mat and superconductivity. Components: Lecture	chemistry, electricity, an nd methods of scientific i ter and apply these to var ntific Literacy	eory of quantum mechanics and the uncertainty ad magnetism. Outcome: Students will become .nquiry, demonstrate an understanding of fundamental cious phenomena including lightning, lasers, quarks
NTSC 107(3)	Course ID:005499	15-MAR-2006
and the impact of societal deci demonstrate an understanding of adaptations for specialization, extraction/use of plant-derived Components: Lecture Course Equivalents: ESP 107	sions regarding their use the critical role of plan and linkages to humans in products. htific Literacy	of plants, their importance to human civilization, and exploitation. Outcome: Students will ats in the biosphere, their physiological processes, acluding agriculture, pest control, and
NTSC 108(3)	Course ID:005500	15-MAR-2006
<pre>treatment of genetic disease, a Outcome: Students will dem molecular, biochemical and syst attendant controversies. Components: Lecture</pre>	s well as the ethical issu onstrate an understanding ems level causes of geneti utific Literacy, CORE Value	rding the origin, transmission, characteristics and les associated with their diagnosis and treatment. of the principles of inheritance, underlying .c disorders, related technologies/policies and their es - Civic Engagement

College of Arts and Sciences - Philosophy - Subject: Bioethics

Course ID:009642 03-MAY-2006 BIET 126(3) Science, Technology and Society This course serves as a broad introduction to the study of science and technology from a distinctively sociological perspective and includes a strong bioethical component. This course examines issues of how scientific knowledge and technologies are created and constructed, the relationship between science and technological development and how both science and technology affect and have an impact on our daily lives. Outcome: Students will exhibit knowledge of a method of social inquiry for following science and technology through society and will be able to apply this inquiry method to the social construction of scientific knowledge and scientific ethics, technology and technological ethics, environment and environmental ethics, and genetic technologies and bioethics. Components: Lecture Course ID:009864 21-FEB-2006 BIET 184(3) Health Care Ethics This course studies philosophical ethics as practiced in the health care setting. Components: Lecture(In person) Course Equivalents: PHIL 184 Attributes: CORE Ethics, CORE Philosophical Knowledge, CORE Values - Justice Room Requirements: General Classroom(1) Course ID:010363 BIET 185(3) 01-NOV-2006 Moral Problems: Medical Issues Christian Life & Practice-Ethics. This course considers the racial, ethnic, and socio-economic disparities in U.S. healthcare and explores possible remedies from the viewpoint of Christian ethics. Outcome: Students will examine the process of moral deliberation, will exercise effective writing and nuanced moral argumentation, will listen to the viewpoints and experiences of others, and will come to an appreciation of the complexities of U.S. healthcare. Components: Lecture(In person) Course Equivalents: THEO 182 Room Requirements: General Classroom(1) BIET 186(3) Course ID:010339 05-MAY-2007 Moral Problems: Ecology Crisis Christian Life & practice-Ethics: This course considers traditional religious and ethical assumptions about humanity and our relationship to the non-human world. Outcome: Students will examine a number of religious and philosophical traditions and learn how they describe nature, how they evaluate non-human nature's relationship to humanity, how they define ""community"" to include or exclude the non-human world, and how they relate or do not relate the sacred to the natural world. Components: Lecture (In person) Green LivingLearning Community Topics: Course Equivalents: THEO 184 Room Requirements: General Classroom(1) BIET 187(3) Course ID:010079 03-AUG-2006 Environmental Ethics This course introduces students to ethical reasoning and to various topics in environmental ethics. Topics may include: pollution, animal rights, and natural resources.. Components: Lecture(In person) Course Equivalents: PHIL 187 Attributes: CORE Ethics, CORE Philosophical Knowledge, CORE Values - Civic Engagement **Room Requirements:** General Classroom(1) BIET 192(3) Course ID:009384 15-MAR-2006 Moral Problems See THEO 192 Components: Lecture (In person) Medical Issues, Ethics HIV/AIDS, Social Ethics of Food Systems Topics: BIET 195(3) Course ID:010566 25-NOV-2007 Introductory Special Topics This Bioethics course is a cross-list for any 100-level course in Philosophy, Sociology, or Theology that introduces students to topics in bioethics and that has no other course specific cross-list number. Outcome: Students will be able to describe what is morally at stake in a special topic in bioethics and will be able to articulate and critique various responses to the topic.

College of Arts and Sciences - Physics - Subject: Physics

12-FEB-2006 PHYS 301(3) Course ID:009825 Mathematical Methods in Physics Prerequisite or corequisite: MATH 263. Lecture and computer laboratory. Mathematical and computer methods in physics and engineering. Topics include vector calculus, functions of a complex variable, phasors, Fourier analysis, linear transformations, matrices, first and second order differential equations, special functions, numerical and symbolic computer applications. Components: Lecture(In person) Course Equivalents: PHYS 271, MATH 355 PHYS 303(4) Course ID:005876 15-MAR-2006 Electronics T Prerequisites: MATH 162 and PHYS 126 Study of analog electronics, including direct and alternating circuit analysis, resonant circuits, diodes, transistors, amplifiers, operational amplifiers, noise, feedback and oscillators. Outcome: Students will understand and manipulate equations and concepts, and gain experience with electronics equipment, plotting and interpretation of data, synthesizing and writing laboratory results, and the formal verbal presentation of results. Components: Lecture Room Requirements: Electronic Classroom(1) PHYS 304(4) Course ID:005877 15-MAR-2006 Electronics II Prerequisite: PHYS 303 A continuation of PHYS 303. Outcome: Students will gain an understanding of regulator and controlled rectifier circuits, modulation and detection, power amplifiers, active-filters, phase-locked loop, lock-in amplifier, and opto-electronic circuits. Components: Lecture **Room Requirements:** Electronic Classroom(1) 01-JAN-1901 PHYS 305(2) Course ID:005878 Nuclear Physics Laboratory Components: Laboratory Room Requirements: Electronic Classroom(1) PHYS 310(4) Course ID:005879 15-MAR-2006 Department Consent Required Optics Prerequisites: MATH 263 and PHYS 235 Electromagnetic nature of light, geometrical optics, polarization, Fresnel relations, interference, Fraunhofer and Fresnel diffraction, Fourier optics, lasers, and holography. Outcome: Students will gain knowledge of the principles of optics and their applications to modern technology, and will gain hands on experience in the laboratory with ability to document and report experimental data. Components: Lecture Room Requirements: Electronic Classroom(1) Course ID:005880 PHYS 314(3) 15-MAR-2006 Theoretical Mechanics I Prerequisites: MATH 264 and PHYS 126 Newtonian particle dynamics, conservation theorems, oscillations, gravitation, generalized coordinates, Lagrange and Hamilton formalisms. Outcome: Students will gain understanding of analytical and numerical methods of mechanics, understanding of principles in dynamics, and experience in applying formalisms of Lagrange and Hamilton to mechanics in preparation for other areas of physics and engineering. Components: Lecture Room Requirements: Electronic Classroom(1) PHYS 315(3) Course ID:005881 15-MAR-2006 Theoretical Mechanics II Prerequisite: PHYS 314 This course is a continuation of Physics 314 and covers dynamics of system of particles, moving coordinates, rigid body dynamics, systems of oscillators, motion in a central force field, relativity. Outcome: Students will gain understanding of analytical and numerical methods of mechanics, and of the laws of dynamics and their applications. Components: Lecture Room Requirements: Electronic Classroom(1)

International Politics

This course is intended to serve as an advanced exploration of the field of international politics. Students will explore the most recent developments in international relations theory and select political developments within the international system, including the evolution of these developments in various regions of the world. Outcome: Students will hone their ability to assess/critique cutting edge theories and developments within the field of international politics.

Components: Lecture

Room Requirements: General Classroom(1)

PLSC 364(3) Course ID:006020 15-MAR-2006

UN & International Organization

(INTS 364) (PAX 364) An examination of the purposes, organization, background, and operations of existing international organizations. Outcome: Students will be able to demonstrate an understanding of the formation and structure of various International Organizations, especially the United Nations, the patterns of political participation and behavior of individuals, private and public groups, and governments in International Organizations, and evaluate the roles and processes of International Organizations.

Components:LectureCourse Equivalents:INTS 364, PAX 364Room Requirements:General Classroom(1)

PLSC 365(3) Course ID:006021 15-MAR-2006

Italian Politics & Government

(INTS 365) (ROST 365) An examination of the institutions, processes, and practices of Italian political life. Major concern is with post-1945 Italian politics. Outcome: Students will be able to demonstrate an understanding of the formation and structure of Italy's contemporary political system, the patterns of political participation and behavior of diverse individuals and groups in Italian society, and evaluate the roles and processes of Italian political institutions.

Components:

15-MAR-2006 PSYC 310(3) Course ID:006168

Prerequisite: PSYC 306. PSYC 275 is also recommended. Special attention is given to the fundamental skills needed to evaluate human service programs including research methodology and research diplomacy. The strengths and weaknesses of several evaluation strategies will be discussed in terms of scientific validity, ethical constraints, and political acceptability. Outcomes: Students apply their developing evaluation skills in a class project and present the data in a written report.

PSYC 311(3) Course ID:006169 15-MAR-2006

Lab in Psychobiology

Lab in Program Evaluation

Prerequisites: PSYC 306, and either PSYC 240 or 305. Introduction to the structures and functions of vertebrate nervous systems, how these systems compute and process information; laboratory experience with concepts and methods in the neurophysiological study of the bases of perception and other behaviors. Hearing is used as an example. Outcomes: Students will learn the concepts of basic neurophysiology and the theory of signal detectability, and have experience applying the logic and formulation of neurophysiological theories of perception.

Components: Laboratory Course Equivalents: BIOL 313 Room Requirements: Lab - Theater(1)

PSYC 314(3) Course ID:006172 Lab in Exper Psych:Cognition Prerequisites: PSYC 250 and 306. Laboratory demonstrations, experiments, and microcomputer applications in

the area of human cognition. Topics vary, but include learning, memory, thinking and language processing... Outcomes: Students gain skills and experience in experimental design, measurement, statistical analyses, and report writing as they relate to research on human cognition.

Laboratorv Components:

PSYC 315(3) Course ID:006173

Lab:Tests & Measurements

Prerequisite: PSYC 306; PSYC 331 or 338 is recommended. Topics include: theory of psychological testing and assessment; historical context and related legal and ethical considerations; basics of test construction and evaluation, including reliability, validity, and standardization; and common measures of personality, attitudes, and ability and their psychometric properties. Outcomes: Students will learn to demonstrate proficiency with psychological testing terminology and concepts.

Components: Laboratory Room Requirements: Lab - Theater(1)

PSYC 316(3) Course TD:006174 15-MAR-2006 Lab in Exper Psych:Sens & Perc

Prerequisites: PSYC 306 and either 240 or 305. Laboratory demonstrations, experiments, and microcomputer applications to the psychophysical and physiological study of sensory systems. The course stresses the research methods and quantitative measures that are used in characterizing sensory processes, especially visual and auditory systems. Outcomes: Students gain skills and experience in experimental design, measurement, statistical analyses, and report writing as they relate to research in sensory processes. Components: Laboratory

Room Requirements: Lab - Theater(1)

Course ID:006176 15-MAR-2006 PSYC 318(3) Lab in Developmental Psych

Prerequisites: PSYC 273 and 306. Lecture and laboratory on empirical studies of developmental processes in humans. Focus is on research in particular content areas within developmental stages (e.g., infancy, Outcomes: Students childhood, adolescence, adulthood) and research on changes in behavior across time. will demonstrate skills and knowledge of developmental methodology, designing, conducting, and analyzing and interpreting the results of a research project, and writing a research paper in APA format.

PSYC 346(3) Course ID:006191 15-MAR-2006 Psychopathology of Childhood Prerequisite: PSYC 273 Consideration of the nature and causes of maladjustment, emotional disorders, and learning disabilities in children in conjunction with approaches to prevention and remediation. Outcomes: Students will demonstrate knowledge of the major categories of childhood psychopathology and methods of diagnosis, theories of causes of maladjustment and mental illness in children and adolescents, and types of intervention strategies. Components: Lecture Room Requirements: General Classroom(1) PSYC 347(3) Course ID:006192 15-MAR-2006 Infancy and Early Childhood Prerequisite: PSYC 273. In-depth study of infancy and childhood using an interdisciplinary approach. Integration of social, psychological, and biological perspectives. Outcomes: Students will demonstrate understanding of basic theory and research in human development, and will develop skills in critical examination of psychological research as applied to current issues in human development. Components: Lecture Room Requirements: General Classroom(1) PSYC 348(3) Course ID:006193 15-MAR-2006 Psychology of Adolescence Prerequisite: PSYC 273. In-depth study of adolescence using an interdisciplinary approach. Integration of cultural, social, psychological, and biological perspectives. Outcomes: Students will appreciate the various factors leading to similarities and differences in the experience of adolescence in America and in other cultures, and will demonstrate understanding of major theories, research methodologies, and empirical knowledge in the study of adolescence. Lecture Components: Room Requirements: General Classroom(1) PSYC 349(3) Course ID:006194 15-MAR-2006 Maturity and Aging Prerequisite: PSYC 273. Overview of theory and research relevant to middle age and aging. Topics include personality, cognitive and social functioning as well as biological functioning. Applications to life situations, such as living arrangements, provision of health services, and retirement, are discussed. Outcomes: Students will demonstrate understanding of major theories, research methodologies, and empirical knowledge in the study of maturity and aging, and learn to recognize and reject myths and stereotypes associated with adult development and aging. Components: Lecture Room Requirements: General Classroom(1) PSYC 353(3) Course ID:006195 15-MAR-2006 Applied Social Psychology Prerequisite: PSYC 275. Applications of principles and methods of social psychology to social issues and problems in such areas as: law and justice, health and health care, education, natural and built environments, population, work, life and intergroup relations. Outcomes: Students will demonstrate the ability to apply knowledge of major theories, research methodologies, and empirical knowledge in social psychology to real-world issues and problems. Components: Lecture Room Requirements: General Classroom(1) PSYC 356(3) Course ID:006196 15-MAR-2006 Consumer Psychology Prerequisite: PSYC 101 Introduction to the field of consumer psychology; including topics such as consumer attitude formation and change, persuasive communication and consumer behavior, the psychology of advertising, consumer decision making, personality and consumer behavior, identity and consumer behavior, and culture and Outcomes: Students will understand and apply theoretical approaches within consumer consumer behavior. psychology and the psychology of advertising. SOCL 216(3) Course ID:006438 15-MAR-2006 The Sociology of Violence The threat of violence is a significant concern for individuals in many societies. In this course, violence will be studied as a social phenomenon. Topics of particular concern include: family violence, gang violence and terrorism. Outcome: Students learn to examine the causes of violence from a sociological perspective. They also learn methods to reduce violence and the harm it causes. Lecture Components: Course Equivalents: PAX 291 **Room Requirements:** General Classroom(1) SOCL 220(3) Course ID:006439 15-MAR-2006 Topics in the Life Cycle An examination of the stages of the life cycle (childhood, young adulthood, parenthood, later adulthood, etc) and how such stages are defined and interpreted by social and institutional forces. Outcome: Students will gain understanding of the role that individual; s societies and institutions play in the definition of the life cycle and the implications it has for society. Components: Lecture Room Requirements: General Classroom(1) SOCL 221(3) Course ID:006440 15-MAR-2006 Aging in Culture and Society The study of aging and the elderly is presented from a cross-cultural perspective. Age is considered a principle of social organization and classification. The impact of demographic and cultural factors on the current position and the future of older people is also considered. Outcome: Students learn the critical role that age plays in social structure and how that relationship is influenced by social, cultural and demographic factors. Components: Lecture Course Equivalents: ANTH 221 Room Requirements: General Classroom(1) 15-MAR-2006 SOCL 222(3) Course ID:006441 Poverty & Welfare in America In this course, students learn to think critically about the character, causes and responses to poverty in American society, using both historical and contemporary evidence. Outcome: Students will understand the strengths and limitations of American welfare policy in relation to poverty. Components: Lecture Room Requirements: General Classroom(1) SOCL 225(3) Course ID:006442 15-MAR-2006 Sociology of Health Care This course examines the sociology of health care with particular attention to: social and psychological factors; health care professionals; inter-personal relations in health care; the organization and use of health services; and the relationship between aging and health. Outcome: Students will understand the role that social forces play in the health and wellness of individuals, the community and society. Components: Lecture Course Equivalents: BIET 225 Room Requirements: General Classroom(1) SOCL 228(3) Course ID:006443 15-MAR-2006 Socl African-Amer Experience A sociological inquiry into the historical and contemporary experience of African-Americans. Social movements and social change, urban and institutional processes, social values and collective behavior, and African-Americans and public policy are among the topics explored. Outcome: Students will gain a deeper understanding of the experiences that African-Americans have in American society and of the social, political and institutional forces that have contributed to the historical and contemporary experience of African-Americans. Components: Lecture Course Equivalents: BWS 228 Room Requirements: General Classroom(1) SOCL 230(3) Course ID:006444 15-MAR-2006 Self & Society This course examines the relationships between the self as a social product and the larger society in which that self is socialized, develops and expresses itself. Various theories of selfhood are explored. Outcome: Students will come to appreciate how selfhood, their own and others, is a product of historical factors as well as social contexts such as class, gender, race and ethnicity.

Birth, Work, Marriage, Death

This course introduces the study of demography by examining trends of fertility, work, marriage, migration and mortality. Outcome: Students will gain an understanding of how the size, composition and dynamics of a population influence the social, economic and political structure of individual nations and the world. Components: Lecture

Room Requirements: General Classroom(1)

SOCL 237(3) Course ID:006449 15-MAR-2006

Professsions and Society

Work involving high levels of expertise--medical, legal, technical, and much else- is a critical component of modern society. This course examines how professional work is structured, the way professionals are trained and organized, the privileges and responsibilities of professional work, and the role of conflicts over expertise in modern society. Outcome: Students will gain an understanding of how work based on knowledge and expertise is organized and on the social and economic factors that contribute to the position of professionals in society.

15-MAR-2006

Components: Lecture

SOCL 240(3) Families

Contemporary family structures encompass a variety of living arrangements and social relationships. This course considers differences and similarities among the various family types and explores the social, cultural and economic forces structuring family life. Outcome: Students will develop an expanded understanding of the varieties of family arrangements and the connections between family life and the wider social, political economic environment.

DANC 111(2) Course ID:010235 14-MAY-2008

Ballet Dance I: Theory and Technique Ballet I is designed to introduce the concepts and vocabulary of ballet with a focus on developing student's body awareness and control. Students will learn about the art form of ballet in relationship to theatre, music and other forms of dance. Outcome: Students will improve their posture, flexibility and coordination. They will develop a reference for enjoying ballet performances and create a foundation for further dance training.

Components: Supervision(In person)

Course Equivalents: THTR 111

Attributes: CORE Artistic Knowledge and Experience

DANC 121(2) Course ID:010240 30-JAN-2007

Modern Dance I: Theories and Techniques

Modern Dance I is designed to increase student;s body awareness, strength, flexibility and musicality. The course studies the technique and theory of Fall and Recovery developed by Doris Humphrey. Outcome: Students will develop a basic dance technique and be able to describe and demonstrate the differences between modern dance and ballet. The will understand the history of the development of modern dance as a uniquely American art form.

Components:Supervision(In person)Course Equivalents:THTR 121Attributes:CORE Artistic Knowledge and Experience

DANC 131(2) Course ID:010239 30-JAN-2007

Jazz Dance I: Theories and Techniques

Jazz I is designed to increase the student's body awareness, enjoyment of movement and appreciation of Jazz dance in theatrical productions. May be repeated once for credit. Outcome: Students will improve their strength, coordination, flexibility and correct posture. They will develop basic skills and vocabulary for performing Jazz movements and a framework to view dance in theatrical productions.

Components: Supervision(In person) Course Equivalents: THTR 131 Attributes: CORE Artistic Knowledge and Experience

DANC 212(2) Course ID:010238 14-MAY-2008

Ballet Dance II: Theory and Technique

Prerequisite: Two semesters of Ballet Dance training. This is a continuing ballet class designed to build on established vocabulary and movement fundamentals with emphasis on ballet as a theatrical art form. Outcome: This class further develops strength, posture, flexibility and coordination. Progressions include more work en relev at the barre, development of leg extensions, single leg jumping and more complex movement combinations. Students will develop awareness of a dancer's role in a ballet production. Components: Supervision(In person)

Course Equivalents: THTR 212

DANC 222(2) Course ID:010236 30-JAN-2007

Modern Dance II: Theory and Technique

Prerequisite: Two semesters of Modern Dance taining. This course is designed to further increase student's body awareness, strength, flexibility and musicality. We will study the technique and theory of Fall and Recovery developed by Doris Humphrey as well as learn short excerpts of repertory to be analyzed. May be repeated once for credit. Outcome: Students will further develop their modern dance technique and be able to execute more physically challenging falls and longer and more complex movement combinations. Components: Supervision(In person)

Course Equivalents: THTR 222

DANC 232(2) Course ID:010237 30-JAN-2007

Jazz Dance II: Theories and Techniques

Prerequisite: Two semesters of Jazz training. Jazz II is designed to further develop student's technical ability and awareness of Jazz dance in theatrical productions. Students will learn about professional Jazz dance in Chicago and improve their strength, coordination, flexibility and correct posture in increasingly complex combinations applying the vocabulary and principles of jazz dance. May be repeated once for credit. Outcome: Students will improve their dance technique, performance skills and appreciation of Chicago's rich tradition of Jazz dance performance.

THTR 142(3) Course ID:009842 15-MAR-2006 Class Voice for Beginners This class is for the student who has never had voice instruction and is interested in learning the art of performance in voice. Strongly recommended for those interested in the music major, theater or public speaking/performance Outcome: Students will demonstrate understanding and application of the fundamentals of music theory, diction, and tone. Components: Lecture(In person) Course Equivalents: THTR 242, MUSC 142 Room Requirements: General Classroom(1) THTR 203(3) Course ID:007061 15-MAR-2006 Dramatic & Theatrical Process This course is an introduction to the basic methods of analyzing and interpreting plays representative of the modern stage (from Ibsen to the present). It explores how text analysis is, for all theatre artists, a critical first step in transferring the printed play text to the stage. Outcome: Students will acquire the ability to analyze a play's structure and ideational content, its characters, and the potential challenges each play presents to theatre artists seeking to produce the play on the stage for a modern audience. Lecture Components: Room Requirements: General Classroom(1) THTR 204(3) Course ID:007062 15-MAR-2006 Playwriting This course is and introduction to the theories and techniques of playwriting with particular emphasis on the analysis of dramatic structure. Outcome: Students will demonstrate an understanding of the theories and techniques of playwriting and dramatic structure through application of these skills in several playwriting exercises and the development of a one act play. Components: Lecture Room Requirements: General Classroom(1) THTR 205(3) Course ID:007063 15-MAR-2006 Theatre in Chicago I This course is an introductory to live theatre performances available in the rich Chicago Theatre Scene. Outcome: Students will demonstrate appreciation of the range of theatre experiences available in the city of Chicago. Components: Lecture Room Requirements: General Classroom(1) THTR 207(3) Course ID:007065 15-MAR-2006 Theatre in Chicago II Theatre in Chicago II follows the same format as Theatre in Chicago I. This course enables students to repeat the course for credit, extending experience and application of critical terminologies and analytical frameworks to attendance of additional live theatre performances in the city of Chicago. Outcome: This course extends outcomes for THTR 205 by application to a broader range of experience in live theatre attendance. Components: Lecture **Room Requirements:** General Classroom(1) THTR 209(3) Course ID:010550 22-NOV-2007 Screenwriting This course introduces students to the process of writing for the screen. Through exercises and analysis of structure and story-telling fundamentals, writers develop a working sense of the paradigm and the art of dramatic writing. Extensive writing requirements cover all aspects of screenwriting, culminating in the development of a workable screenplay. Outcome: Students will demonstrate an understanding of the fundamentals of screenwriting through the completion of various writing exercises and the creation of a screenplay. Components: Lecture(In person) Course Equivalents: IFMS 209, CMUN 209 Room Requirements: General Classroom(1)

WSGS 340(3) Course ID:010653 17-DEC-2007 Psychology of Women Prerequisite: PSYC 101 Review of psychological aspects of women¿s experiences. Topics include psychological aspects of biological events such as menarche, pregnancy, menopause; aspects of women;s work and family roles; and mental health issues relevant to women. Outcomes: Students will demonstrate knowledge of critical contemporary issues impacting women and girls, and critically evaluate/analyze academic theory, social institutions, and media. Components: Lecture Course Equivalents: PSYC 340, WOST 340 WSGS 343(3) Course ID:010654 17-DEC-2007 Stds Vict Per:Gender Ideo Components: Lecture Course Equivalents: WOST 343 17-DEC-2007 WSGS 346(3) Course ID:010655 Biology of Women The biology of women at pivotal points in the lifespan, along with the biological changes that occur from one life stage to another. The interaction of society (e.g., medical field) with women at each of these points in time. Topics to be discussed include the evolution of sex and gender, gender differentiation and diversity, reproductive processes, disease, detection and treatment, and violence against women. Components: Lecture Course Equivalents: WOST 346, ANTH 346, BIOL 346 WSGS 350(3) Course ID:010656 17-DEC-2007 Amer Women 1820-1920 Pol & Lit Components: Lecture Course Equivalents: WOST 350 WSGS 360(3) Course ID:010657 17-DEC-2007 Picturing Women in Renaissance and Baroque Art An examination of issues related to women, art, and society in early modern Europe (15th-17th centuries) through a study of women as subject matter, viewers, producers, and patrons of art. A multi-disciplinary approach is employed to explore how gender as a social, political, and psychological category is reflected in and reinforced by visual culture. Outcome: Students will demonstrate knowledge of the ways gender is constructed in society, the origins and effects of gender attitudes, the interrelation between gender and visual culture, and the ways women have claimed agency. Students will critically analyze visual culture and gender attitudes and demonstrate knowledge of feminist theory and scholarly methods. Components: Lecture Course Equivalents: FNAR 360, WOST 360 Course ID:010658 17-DEC-2007 WSGS 365(3) Women, Gender and Embodiment in Islam

This course will consider gender both as articulated in normative Islamic religious and legal systems and as embodied during various historical periods in a range of Muslim societies. Students will read a number of the most important academic studies in this field and consider anthropological and cultural materials including films and short stories that disclose Muslim practices and concepts of maleness, femaleness, and gender relations.

Exceptional Learner II This course provides in depth understanding of the ethical and professional issues related to collaborative service provision for children with disabilities. Outcome: By viewing ability within the broader context of human diversity, students will learn instructional strategies that foster a student; meaningful participation in heterogeneous classrooms as well as the larger communities in which they live. Components: Laboratory(In person)

Room Requirements: General Classroom(1)

CIEP M33(3)

Accessing and Adapting the General Education Curriculum

Within this course, candidates explore methods to adapt the general education curriculum in order to meet the individual needs of students with disabilities. Issues of differentiating student needs, long and short-term planning, technology-assisted learning, and vocational and social skills curricula will be addressed along with behaviors and modification related to low incidence exceptionalities. Outcome: Candidates will demonstrate an understanding of adapting the general education curriculum for students with special needs through the design of a universalized lesson plan, a synthesis of relevant literature, and researching assistive technology.

Components: Lecture (In person) Room Requirements: Electronic Classroom(1)

CIEP M34(3)

Family, Community and School-Based Consultation

Within this course, candidates explore how members of families affected by disability and school/community professionals can enter into productive partnerships and create positive outcomes for students in elementary and secondary schools. Different approaches to work on school or community based teams, the different aspects of planning and implementing team porcess, and the challenges and threats to that process, are examined. Outcome: Candidates will demonstrate an understanding of collaborative relationships, and design and evaluate a wraparound plan for a student with a disability based on case study information and research.

Secondary Methods: Social Studies

In this course students examine teaching and learning in the social studies in grades 9-12. Students explore a variety of methods for teaching each discipline within the social studies as distinct subjects and as elements of interdisciplinary courses. The course emphasizes curriculum planning, practice teaching in the social studies and fieldwork in schools and social studies-related organizations. Outcome: Students will design curricula and demonstrate instructional strategies in the social studies that meet the needs of diverse learners and focus on deep engagements with social studies content.

Theories of Learning

CIEP 338(3)

The purpose of this course is to investigate the factors that influence how students access, process, store, retrieve, and make use of experiences to (1) increase their understanding of academic content; (2) establish appropriate personal-social interactions; and (3) make transitions into the broader community. Outcome Students will apply theory strengthened by documented research findings to (1) design lesson plans consistent with the students; developmental levels and ways of knowing (learning styles) and (2) develop strategies to assess students; learning.

Adaptive and Assistive Technology In this course, students will learn how to make all physical and virtual aspects of school fully accessible for their students, other faculty, and family members. They will have hands-on experience with a wide range of assistive and adaptive technologies (low, medium, and high tech) and become familiar with the A/A terminology and the most recent legislation related to AAT. Outcome: Students will be able to integrate AAT into assessment plans, the IEP process, lesson planning and review, and daily classroom routines. Keeping in mind the specific characteristics of individual students, they will choose and then make use of appropriate technology to accomplish specific instructional/academic, physical, and social/emotional objectives.

This course provides the research and practical applications of literacy assessment instruments to assess, diagnose, plan, evaluate, and revise effective instruction that meets the needs of all students, including those at different developmental stages and those from different cultural and linguistic backgrounds. Emphasis is on the communication of results of assessments to stakeholders. Outcome: Students will be able to competently assess and diagnose the reading/literacy abilities of students experiencing some difficulties and provide and communicate a plan for effective instruction.

Methods/Materials for Teaching ESL

This course focuses on methods and materials for teaching ELLS within bilingual and ESL classrooms. Program models, methodologies, and strategies will be presented. Methods and materials for literacy development and content area instruction in the native language will be discussed. Methods of teaching listening, speaking, reading, and writing in the second language will be presented along with methods of integrating the teaching of language and academic content. Course Outcomes: Learners will demonstrate familiarity with theories and instructional methodologies and strategies for teaching ELLs. Learners will identify and use resources, including books, computer based information, professional organizations, and human resources and select/create appropriate material for the instruction of ELLs. Learners will demonstrate understanding of the crucial role of educational leaders in integrating advocacy and instruction in the education of ELLs.

Instructional Leadership for Multicultural Schools

02-JUN-2006

This course will focus on teaching children from diverse linguistic, cultural, and racial backgrounds within the context of a society faced with issues of poverty, discrimination, racism, and sexism. Learning and communication styles and the impact of teacher expectation on student achievement will be examined. The relationship between identity construction and school success will be explored. The effective utilization of the rich resources represented by the home and the community will be investigated. Course Outcomes: Learners will demonstrate ability to think critically about issues of race, class, culture, and gender, and to analyze how these issues play themselves out in our schools and school systems and formulate questions

regarding the role of culture in shaping human behavior. Learners will adapt instruction to diverse learning styles and accommodate diverse communication styles. Learners will demonstrate understanding of the importance of involvement with students families and communities.

02-JUN-2006 Course ID:009931

Assessment of Bilingual Students

This course will prepare educators in leadership roles to differentiate between student-learning difficulties due to exceptionality and those due to insufficient supports in second language acquisition. It will further prepare educators to access language dominance and/or degree of bilinguality in ELLs especially in making decisions of educational placement. Formal and informal methods of evaluation, including issues of non-discriminatory testing, will be examined for the assessment of language skills and academic proficiency.

Course Outcomes: Learners will understand and describe formal and informal assessments for students language and content-based learning. Learners will distinguish procedures for identifying problems of language proficiency from other learning problems. Learners will utilize a variety of alternative assessment measures of oral language proficiency, literacy development, and academic achievement.

ELPS 219(3) Course ID:002481 17-APR-2007 American Education

This course examines the history, aims, organization, and control of public and private schools in the United States. Emphasis is placed on the historical examination of issues of diversity, inclusion and exclusion as they relate to education. Outcome: Students will demonstrate the ability to evaluate and explain the forces of historical continuity and change in American education.

Components:Discussion, LectureAttributes:CORE Historical KnowledgeRoom Requirements:General Classroom(1)

ELPS 230(3) Course ID:012593 01-JAN-1901

Globalization, Education and Childhood

This course examines contemporary global shifts and transformations in how schools and other educational settings are set up and operate. In tandem with this the course examines the experience of childhood and notions of what it means to be a child; both in terms of how this varies culturally, socioeconomically, and regionally, as well as how these experiences and conceptualizations are presently being transformed. Outcomes: Students will be able to demonstrate an understanding of how global and local issues are interwoven with regard to education. Students will be able to articulate a nuanced understanding (as regards schooling and education) of the ways that social justice concerns are being both advanced and hindered in our contemporary globalized world.

Components:	Lecture(In person)

ELPS 240(3) Course ID:012594 01-JAN-1901 Urban Education: Policy and Practice

This course introduces students to some of the central policy questions currently afoot in American public education through consideration of one particular field of concern, Urban Education. Explores the sociological dimensions of schooling, the important questions of how race, social class and ethnicity impact American education, and the relationship between resources and outcomes at the heart of arguments about schools. Outcomes: Students will be able to analyze the multiple and contested factors that influence urban education in the US. Students will be able to demonstrate an understanding of the ways that policy is connected to practice in urban education.

Components:Lecture(In person)Attributes:International StudiesRoom Requirements:Electronic Classroom(1)

Grad Schl at Medical Center - Cell Bio/Neurobiol/Anatomy - Subject: Cell Bio/Neurobiology/Anatomy

Course ID:001539 15-MAR-2006 CBNA 301(6) Struct of the Human Body The student develops a knowledge and understanding of the basic concepts and facts of human gross anatomy as it relates to function and clinical problems. Lectures, clinical case-based and problem-based learning, computer-aided instructional materials, and student dissection. Components: Lecture Room Requirements: General Classroom(1) CBNA 305(5) Course ID:001541 15-MAR-2006 Medical Neuroscience The student gains a fundamental knowledge of gross and microscopic structure of the human nervous system. This also includes the organs of special sense. Integrated into this structural base are the major physiological, pharmacological, and neurological aspects of the nervous system. Laboratory sessions permit individual study of the structure of the human brain and spinal cord. Components: Lecture Room Requirements: General Classroom(1) CBNA 401(6) Course ID:001542 15-MAR-2006 Gross Anatomy The student develops a knowledge and understanding of the basic concepts and facts of human gross anatomy as it relates to function and clinical problems. Lectures, clinical case-based and problem-based learning, computer-aided instructional materials, and cadaver dissection serve as guides to laboratory study. Components: Lecture Requirement Group: Restricted to Graduate School students. **Room Requirements:** General Classroom(1) CBNA 403(3) Course ID:001543 15-MAR-2006 Histology The course is designed to provide the student with a basic knowledge and understanding of the structure and function of the human body at the light and electron microscopic level. The interdependence between structure and function in the different tissues and organs of the body is emphasized. Clinical and research application of the course material are also stressed. Components: Lecture Requirement Group: Restricted to Graduate School students. Room Requirements: General Classroom(1) CBNA 405(3) Course TD:001544 15-MAR-2006 Neuroscience The student gains a fundamental knowledge of gross and microscopic structure of the human nervous system. This also includes the organs of special sense. Integrated into this structural base are the major physiological, pharmacological, and neurological aspects of the nervous system. Laboratory sessions permit individual study of the structure of the human brain and spinal cord. Components: Lecture Requirement Group: Restricted to Graduate School students. Room Requirements: General Classroom(1) CBNA 411(2) Course ID:001545 15-MAR-2006 Advanced Gross Anatomy The study of the gross structure of the human body at an advanced level presented at conference sessions. Registrants for this course may include graduate students, advanced medical students, as well as those who hold the M.D. degree and are concurrently registered for advanced work in one of the clinical departments. Components: Lecture Requirement Group: Restricted to Graduate School students. Room Requirements: General Classroom(1) Course ID:001546 CBNA 415(3) 15-MAR-2006 Developmental Biology The focus of this course is on the cellular mechanisms of differentiation, chiefly in vertebrate system. Topics include factors involved in commitment and induction, differential gene expression, role of growth factors, extracellular matrix, and cell-cell interactions. Components: Lecture Requirement Group: Restricted to Graduate School students.

Grad Schl at Medical Center - Cell Bio/Neurobiol/Anatomy - Subject: Cell Bio/Neurobiology/Anatomy

Course ID:001547 15-MAR-2006 CBNA 421(3) Cellular Biology A course that provides knowledge of the structure and function of cells, including the experimental foundations of cell and molecular biology (this course is the same as the BMSC 312 in the Core Curriculum. Lecture Components: Requirement Group: Restricted to Graduate School students. Room Requirements: General Classroom(1) CBNA 425(3) Course ID:001549 15-MAR-2006 Basic Ultrastructure An introduction to the fundamentals of electron microscopy and to the ultrastructural basis of the cells and tissues of the body. The aims of the course to learn: (a) the basic operation of the electron microscope and auxiliary equipment; (b) specimen preparation techniques; and (c) and recognize the ultrastructure of cell constituents. Components: Lecture Requirement Group: Restricted to Graduate School students. Room Requirements: General Classroom(1) CBNA 431(2) Course ID:001551 15-MAR-2006 Advanced Neuroscience A multi-disciplinary approach to the study of the nervous system at an advance level, which includes participation by faculty of various basic science and clinical departments. Topics for presentation and discussion are drawn from all aspects of the nervous system structure and function. Special emphasis is placed on recent experimental developments in the field of neuroscience. Components: Lecture Requirement Group: Restricted to Graduate School students. Room Requirements: General Classroom(1) CBNA 440(1) Course ID:001555 15-MAR-2006 Neuroimmunology Advanced reading course providing an overview of the CNS-immune interactions. Components: Seminar Course Equivalents: NRSC 440 Requirement Group: Restricted to Graduate School students. CBNA 441(2) Course ID:001556 15-MAR-2006 Signal Transduction The study of the basic mechanisms of how hormone, neuroendocrine and growth factor messages are transduced into actions of the cell. Major signal transduction pathways within the cell will be explored (cross reference with Physiology 471) Components: Lecture Requirement Group: Restricted to Graduate School students. Room Requirements: General Classroom(1) CBNA 442(1) Course ID:001557 15-MAR-2006 Anatomical Techniques A survey course presentation of various anatomical techniques that are used in the research lab is presented. Components: Lecture Requirement Group: Restricted to Graduate School students. Room Requirements: General Classroom(1) CBNA 445(0 - 1) Course ID:001559 15-MAR-2006 Scientific Litr: Review & Critique Students are taught critical evaluation of scientific literature, hypothesis testing and presentations. This course involves attendance at scientific presentations by students and outside speakers and a journal club component. Both staff and students participate and the class is only offered during the fall semester. This course alternates with Review and Seminar 446. Seminar Components: Requirement Group: Restricted to Graduate School students. Room Requirements: Seminar(1)

Outcome: Students will demonstrate an ability to read, think, write, and speak critically about various genetic approaches used to identify essential genes, mutagenesis and recombination, transcription, development, symbiosis, and pathogenesis. Lecture Components: Requirement Group: Restricted to Graduate School students. Room Requirements: General Classroom(1) MBIO 490(1 - 3) Course ID:005136 01-JAN-1901 Spec Tps in Molecular Biology Components: Lecture Chromatin Structure and Gene Regulation, Stem Cell Biology Topics: Requirement Group: Restricted to Graduate School students. Room Requirements: General Classroom(1) 15-MAR-2006 MBIO 499(1 - 9) Course ID:005137 Research in Molecular Biology The students do mentored work in a laboratory on a research project. Their performance is evaluated by their mentor at the end of the year, and is given a pass/not pass grade. Outcome: To develop the ability to organize a research project proposing hypotheses and testing them in the laboratory and against the current literature. Components: Lecture Requirement Group: Restricted to Graduate School students. Room Requirements: General Classroom(1) MBIO 501(0 - 1) Course ID:005138 15-MAR-2006 Molecular Bio Journal Club This is a weekly course where students take turns to present a scientific paper. Following the presentation there is a discussion by students and faculty. Students prepare the presentation under the supervision of a faculty mentor. Outcome: To develop the ability to read and analyze a scientific paper and to develop oral presentation skills and appropriate visual aids. Seminar Components:

Grad Schl at Medical Center - Microbiology and Immunology - Subject: Microbiology and Immunology

Course ID:005296 15-MAR-2006 MIIM 431(3 - 5) Molecular Biol Animal Viruses This is an advanced virology course with an emphasis on the use of animal viruses as model systems. A review and discussion of current literature serves to exemplify the concepts presented in lecture. Outcome: Students will be able to discuss the different molecular strategies utilized by different animal viruses for transcription, translation, genome replication, and how these strategies illuminate the molecular biology of mammalian cells. Components: Lecture Course Equivalents: MBIO 431 Requirement Group: Restricted to Graduate School students. Room Requirements: General Classroom(1) Course ID:005297 15-MAR-2006 MIIM 441(3) Immunology-Immunochemistry This is an advanced immunology course that emphasizes structural concepts in immunology. Review and discussion of current literature exemplifies concepts presented in lecture. Outcome: Students will demonstrate an understanding of the chemical definition of antigens, immunogens, structural concepts in immunology, immunoglobulin structure, structure of antigens and their interactions, and recognition of antigen by T-cells and B-cells. Lecture Components: **Room Requirements:** General Classroom(1) MIIM 442(3) Course ID:005298 15-MAR-2006 Cell & Molecular Immunology This is an advanced immunology course that examines the cellular and molecular basis of the immune response. Outcome: Students will be able to demonstrate an understanding of the cellular and molecular basis of the immune response, as well as the cellular cooperation essential to the nature of immunology. Components: Lecture Room Requirements: General Classroom(1) 15-MAR-2006 MIIM 443(4) Course ID:005299 Molecular B-Cell Immunology This is an advanced molecular immunology course with emphasis on proteins, genes and molecular interactions within the B-lymphocyte compartment of the immune system. Course includes critical evaluation of recent Outcome: Students will demonstrate an understanding of proteins, genes and molecular literature. interactions within the B-lymphocyte compartment of the immune system. Components: Lecture Room Requirements: General Classroom(1) MIIM 461(3) Course ID:005302 15-MAR-2006 Microbl Cytology & Ultrastruct This is an advanced course that presents the principles and application of light and electron microscopes for the study of cell structure and function. Outcome: Students will demonstrate an understanding of the principles of light and electron microscopes and their use as tools in cellular and molecular biology. Components: Lecture **Room Requirements:** General Classroom(1) MIIM 471(4) Course ID:005303 15-MAR-2006 Molecular Microbial Genetics This course introduces advanced students to the importance of genetics to a wide range of biological Outcome: Students will demonstrate an ability to read, think, write, and speak critically problems. about various genetic approaches used to identify essential genes, mutagenesis and recombination, transcription, development, symbiosis, and pathogenesis. Lecture Components: Requirement Group: Restricted to Graduate School students. **Room Requirements:** General Classroom(1) MIIM 490(2) Course ID:005304 15-MAR-2006 Molecular Biol of Oncogenesis This course is an advanced course that provides a detailed analysis of molecular events that result in the

tumorigenic transformation of eukaryotic cells. Outcome: Students will demonstrate an understanding of oncogenesis by DNA and RNA tumor viruses, the role of oncogenesis and their relationship to normal genes, hormonal effects, and chromosomal abnormalities.

International and Comparative Employment Law

This seminar will begin with a brief baseline description of some of the most significant features of United States labor and employment law.Comparative materials will then cover the basic employment laws of Canada and Mexico. We will then look at the regional regime established in the NAFTA labor side accords. Next we will move to Europe to study the employment laws of the United Kingdom, Germany and France, followed by the regional employment laws generated by the European Union. Following that, we will look at the employment laws of Japan, China and India. The final focus of the seminar will be on International labor law, particularly the International Labor organization.

School of Law - Law Department - Subject: Law

LAW 443(2) Course ID:010214 16-OCT-2007 Immigration Law and the Workplace

An estimated 12 million people live and work in the United States illegally, according to many news accounts. As the immigration debate rages, the focus is on both the immigrant workers and the employers who supply the jobs. It has been illegal to employ unauthorized immigrants in the U.S. since 1986. The Immigration Form & Control Act (IRCA) requires all employers to verify employment eligibility through the I-9 form, but the government has not been consistent enforcing immigration laws in the workplace. Moreover, many states and municipalities have taken on the issue and have passed their own immigration laws. The Immigration and Customs Enforcement (ICE) agency is responsible for ensuring that employers comply with the law and has issued new priorities in workplace enforcement. Other laws protecting workers, such as labor and comprehensive immigration reform. This course will focus on the obligations of US employers, both under IRCA and beyond and the implications of illegal immigrant employment. It will examine pitfalls that await an **Components:** Lecture (In person)

Juvenile Justice

Loyola University Chicago

Course Catalog

Run Date: 08/14/2013 Run Time: 15:33:55

School of Law - Law Department - Subject: Law

LAW 608(2) Course ID:004733 01-JAN-1901

This course will attempt to answer the following questions: How should society handle allegations of criminal behavior by children? In what way should the proceedings be designed to address the differences between children and adults? Who should decide whether a child should benefit from special treatment, judges or legislators? What responsibility do parents and communities bear in providing children an opportunity to change their behavior? How should the justice system and the school system interact? While the intersection between the child welfare and juvenile justice systems will be discussed, this course will not address child welfare practice generally or in much detail. Students will be required to prepare brief position papers during the term. The remainder of the grade will be based on performance in class and on a final examination or a major research paper written in lieu of the final exam.

Intnl Children's Human Rights

In the last decade, children have become ""the newest kids on the human rights block."" This seminar examines new laws and treaties developed to respond to age-old problems faced by children around the world. The course begins with a study of the U.N. Convention on the Rights of the Child, the most rapidly and widely accepted human rights document in the history of international law. It then examines ways in which these laws are being implemented, including a review of child and family law cases decided by the European Court of Human Rights in Strasbourg. The course explores such substantive areas as the comparative treatment of child abuse and delinquency, and the issues of child labor, international abduction, the plight of child soldiers, and the sexual exploitation of children.

School of Nursing - School of Nursing - Subject: Health Systems Management

HSM 110(3) Course ID:009913 19-APR-2006

The course is comprised of two credit hours of classroom/didactic content and one credit hour of service. This course provides an introduction to the healthcare system, orienting the student to its overall structure, functions, and processes. The variety of roles and functions within the different segments of the health care industry are identified to assist the students in considering his/her potential area of specialization and ultimate career path. The description and possible roles within various health systems positions are defined including the roles and functions of administrators, including boards of directors in health agencies, systems and organizations. Service credit is achieved through volunteering at a selected health care agency.

Components: Lecture (In person) Room Requirements: General Classroom (1)

HSM 210(3) Course ID:010171 06-NOV-2006 Introduction to Global Healthcare

(pre-requisite: GNUR 207 or consent of instructor) (Spring, Sophomore) This course will provide students with the opportunity to compare and contrast contemporary problems in health services policy and delivery in developed and developing nations. Students will analyze national performance from a financial, management, government, private sector and public policy perspective. The course will assist students to obtain a more complete understanding of the problems and possible solutions to U.S. health system inefficiencies and inequities by seeking an international perspective. Inefficiencies and inequities of other nations will be identified and ideas that have worked to increase access and quality of health services will be described. **Components:** Lecture(In person)

Aging in America

HSM 220(3)

The focus on this course is the phenomena of `Aging in America¿. With our ever growing aging population, it is important to understand the aging process, how the aging population affects society and how society can promote well-being for our `agewise¿ citizens. The impact of the aging population on the healthcare system and the unique health needs of this population will be examined. Emphasis will be placed on options for long term care and the treatment of chronic illness. The diversity of the aging population and the myths and stereotypes of aging will be explored. Discussions will address psychosocial and physical issues, financial resources, legal and ethical issues as well as social justice concerns related to care of the elderly, public policy and services, and the potential vulnerability of the aged. Components: Lecture

HSM 230(3) Course ID:010040 09-NOV-2007

Health Care Vulnerable Populations

(pre-requisite: GNUR 207) (Spring, Junior) This course will provide students with an examination of health status and health access issues among diverse, vulnerable populations in the United States. The primary objective of the course is to build on previous content related to the policies, epidemiological, cultural, and linguistic factors that influence the etiologies of diseases within vulnerable subpopulations and contribute to health disparities. The approach will serve to analyze the health care access problems faced by vulnerable populations that constrain efficient management of services and equitable delivery of health care. This course will concentrate on filling the void that exists surrounding the lack of information available for those concerned with the health access and status of vulnerable populations in the United States. In addition, students will also benefit from learning the importance of linguistically appropriate considerations regarding health care. This course is designed to provide insight into how the health care **Components:** Lecture(In person)

Req. Designation: Service Learning Room Requirements: General Classroom(1)

HSM 240(3)

Health Care Workforce Environment (Spring, Junior) This course is designed to introduce the student to the broad range of workforce environment issues and concerns associated with employment within a health care organization. Specific areas of study include service line management, environmental issues related to toxic and hazardous waste disposal, needle-stick injuries, radiation safety, workforce safety, ergonomics, mechanical and noise issues, and the use of technology. Disaster planning and preparedness along with the role of FEMA will be explored. Considerations of the impact of homeland security initiatives will be examined. The role of OSHA will be examined. Students will develop an understanding of the need for planning and resource allocation to assure a safe environment for employees, patients, and visitors.

HSM 310(3)

Course ID:010172 Introduction to Health Care Project Management

(Spring, Sophomore) This course is designed to introduce students to the discipline of project management and its importance as a management tool in healthcare. The processes of defining the project, planning the project, managing the project team, controlling the project, and completing it including its evaluation form the structure of the course. The project management framework consisting of performance specifications, time management, and costing/budgeting will guide the student through the project management process. Special emphasis will be placed on the benefits of the use of project management in healthcare through the use of examples and case studies.

Components: Lecture (In person) Room Requirements: General Classroom(1)

Course ID:010043 HSM 320(3)

Health Care Planning and Evaluation

(pre- or co-requisite ; GNUR 360; Fall, Senior) This course introduces the student to the planning and evaluation of health care programs. Emphasis will be placed on measurement and analysis of quality outcomes. Psychometric, economic, political and ethical issues related to health program evaluation are explored. Students become familiar with the theory and methods used to collect and analyze health care data in order to improve clinical outcomes and the quality of care.

Lecture(In person) Components: Room Requirements: General Classroom(1)

HSM 325(3) Course ID:010370 19-MAR-2007

Health Care Fiscal Management

(Spring, Junior; pre-requisite FINC 332) This course examines the concepts of cost accounting, cost behavior, budgeting, cost/benefit, cost-effectiveness analysis as applied to health care administration. Financial concepts and reimbursement mechanisms for health providers are examined including the cost of health care in society. Examination of the impact of the uninsured on the cost of health care will be included. Reimbursement coding, coverage, and payment will be explored. The use of technology to manage data is explored. Describes how cost data can be used for decision-making.

Components: Lecture(In person) Requirement Group: Restricted to Nursing students. Room Requirements: General Classroom(1)

HSM 330(3) Course ID:010044 01-NOV-2007 Health Care Legal and Regulatory Environment

(Fall, Senior) This course introduces the student to the corporate, legal, and regulatory environment of the health care industry. EEOC, HIPAA, COBRA, ERISA and the ADA and their impact on the provision of care, the use of technology, and on market and health care research are explained. The role of the FDA, CMS (including Medicare fraud and abuse), and other federal and state agencies involved in certificate of need, professional licensure, and insurance oversight is examined. Special focus on the Joint Commission for Healthcare Organizations (JCAHO) and its role in standards, payment and quality will be
